BIG INDUSTRY

SIERRA CLUB BEVERAGES CARRY NAME OF GLENDAL THROUGHOUT WEST

The factory of the Henry-Brown Company, Inc., in which is manufactured the Sierra Club Ginger Ale is the distributing center for a huge territory with an ever-increasing demand for this famous beverage.

This territory stretches from San Diego to the Canadian border and east to the Rocky Mountains.

There is, of course, a reason why this factory is located in Glendale. There is a reason why Glendale was given preference over Los Angeles for her vast terminal and shipping facilities.

The prime requisite for any Ginger Ale of quality is pure water, and it is not perhaps generally known that Glendale offers this to a high degree. The Glendale water is specially free from minerals and salts in solution, although there is a certain amount of vegetable matter contained in suspension. These qualities are due to the fact that the upper country on the north side of the Verdugo Mountains is a natural sand gravel filter, containing little or no mineral or alkali. However, as the water comes to the surface it accumulates a small degree of vegetable matter in a suspended form. This very slight defect is entirely overcome at the Henry-Brown Company.

(Continued on Page 3)

DEATH OF MISS EILEEN BRACKNEY

Miss Eileen Brackney, only daughter of Mrs. Nina Brackney, died Saturday, July 24th, at the home of her cousin, Mrs. Bennett, 217 South Jackson street. She had been a patient sufferer from tuberculosis for several months. This dread disease fastened on her following an attack of influenza last winter. Deceased was born at Des Moines, Iowa, in September, 1896, she was nearly 24 years of age. She was of a very lovable disposition and popular with her young associates, who will miss her greatly. She was the stay and comfort of her widowed mother, whose only companion she had been for years past. They formerly lived in Pullman, Wash., and later at Great Falls, Montana, from whence they came to Glendale. Interment was in Forest Lawn after funeral services held in the Little Church of the Flowers.

C. D. LUSBY RETIRES FROM GLENDAL SAVINGS BANK

C. D. Lusby, cashier of the Glendale Savings Bank for several years past, has sold his interest in the bank to W. S. Perrin and will retire from the business on August 1st, feeling the need of rest after the close confinement of business since 1913. Mr. Lusby has been largely instrumental in putting the institution on a thorough paying basis, developing the business with its capital stock of \$50,000 to its present condition with resources of half a million. He will remain in Glendale, but will rest for awhile before actively engaging in business again.

AMERICAN LEGION

NEWS AND NOTES OF THIS PATRIOTIC ORDER

An old-fashioned barn dance will be given by the American Legion Saturday evening, August 6th, in the new Maxwell garage building at 230 North Brand. There will be dances and country dances, clder, doughnuts and everything else to insure a good time. Silas Cornfodder will dance an old-fashioned jig. Put on your Rube clothes and be one of the Rubes.

The regular meeting of the Glendale Post will be held Friday evening, August 5th. There will be free ice cream, cake and entertainment. Legion members are urged to not forget.

An American Legion band of nearly 25 pieces has been organized. The first meeting was held on the night of July 15th and the third on Wednesday night of this week, when all the members were lined up. These are the three Percy brothers, W. Sullivan, Wilbur Lee, Ed Moniot, Maurice and Merrill Burke, Ed Kirri, Louis Lambermont, Bob Danner, Frank Prouty, Francis Bacon, Levert Goddard, Elroy Flynn, Farris and I. S. Brown, Percy Wilmot McIntyre, Ted Hopping, Mr. Starr and I. S. Brown, Percy and Wilmot McIntyre, Ted Hopping, Mr. Starr and Geo. Grist. Ed Moniot and Wilbur Lee are managers and Mr. Ashton director of the band.

MURDER IN BURBANK

NIGHT WATCHMAN NORMAN KILLED, CONSTABLE ED PURRIER SERIOUSLY WOUNDED

At 1:30 o'clock this morning three men in a big white Stutz car drove up to the Guarantee Tire & Vulcanizing Company shop in Burbank, broke in and started to carry out tires and other material. Night Watchman Robert Norman and Constable H. E. Purrier were attracted to the spot and, surprising the burglars in the act, ordered them to hold up their hands, at the same time covering them with their revolvers. The men obeyed and Purrier started to handcuff one of them. He had just snapped the last cuff on the bandit's wrist when the other two suddenly turned and ran, at the same time drawing revolvers and opening fire. Norman fell at the first shot and died almost instantly from a bullet that tore through his mouth and came out at the back of his neck, probably severing the spinal cord. Purrier was shot in three places and fell, desperately wounded. City Marshal Catlin heard the shots as he was going home and rushed to the scene. Hurriedly ordering the dead and wounded men looked after he at once called up the sheriff's office and Los Angeles police headquarters. In a very short time deputy sheriffs and Los Angeles policemen were scouring the country in swift autos, trying to apprehend the murderers. At 6 o'clock Deputy W. Lee Couts and his party arrested a man near the old L. A. Pigeon Farm who gave the name of James L. Jones and had two new tires in his possession. He said he was with the bandits when they committed the burglary and murder, but was in the shop and took no part in the shooting. He told an improbable story of his doings last evening and is now being "sweated" by the officers.

Word received by the Evening News at 11:30 was that there was absolutely no hope for Purrier. He was shot through the lungs and twice in the face. He has a wife and his parents are living in Burbank, also. He is well known and liked in Glendale, which he visited very often in his official capacity and was known as "Ed" by many.

Robert Norman, the slain night watchman, was about 35 years old. He came to Burbank about a year ago and formerly worked on the aqueduct. He had no family and his constant companion was a dog he had great affection for.

ENTHUSIASTS

DR. AND MRS. CAMERER, FROM ILLINOIS, DELIGHTED WITH GLENDAL

Glendale counts herself fortunate in gaining as residents, Dr. and Mrs. J. D. Camerer, recently of Kimmund, Illinois, where the doctor was a prominent physician. During the year of the Exposition Dr. and Mrs. Camerer were in Glendale a week visiting Mrs. H. W. Augustus of 203 West Los Feliz Road, a relative. That week in Glendale was of so pleasant a nature that three years ago they visited Glendale as tourists, staying four months. Since that time their plans for the future included a home in Glendale.

Last fall they again came to California, sojourning in San Diego where their son, Dr. C. Camerer, a Lieutenant-Commander, is doing duty at the naval hospital in that section. Four weeks ago they came to Glendale to make their home and have now purchased the residence at 311 West Garfield from Clyde F. Morrison. When they left Illinois they sold their furniture so have had the pleasure of furnishing their bungalow and starting housekeeping anew.

The doctor and his wife are royal entertainers and have had several house guests recently. Mr. and Mrs. E. M. Schemmerhorn and young son of Illinois, who have been touring the west coast this summer, were visitors last week, also Mr. and Mrs. M. A. Graham and Miss Ware of San Diego who were en route to the Olympic mountains for a summer sojourn. Mrs. Graham is the president of the children's orphan home in San Diego. Their house guest this week is Miss Eda Longfellow, a talented musician of Vallejo, California. Miss Longfellow has spent the past month in San Diego.

Mrs. C. R. Appenfelder of 106 West Elk avenue, who is the fortunate owner of a new Cleveland Six, is waiting for the gas situation to improve before trying the car on long trips.

CANTU RECRUITS TROOPS IN MEXICALI

THOUGH NO MEXICAN FORCES ARE YET EN ROUTE TO LOWER CALIFORNIA IT IS REPORTED

(Special Service to Glendale Evening News)

CALEXICO, July 30.—No Mexican federal forces have yet been sent from the west coast of Mexico to Lower California according to reports reaching Governor Cantu, Pablo Dato, father-in-law of the governor, stated today.

In spite of this report increased activity continued today with the enlistment of men in preparation for hostilities. More than a thousand recruits have been obtained in the Mexicali region.

MEXICALI, July 30.—Provisional President de la Huerta has planned telegraphic conferences with Governor Cantu in efforts to bring Cantu to terms without engaging in hostilities. Federal officials said Governor Cantu must recede from his position as governing Lower California virtually as an independent country or an ultimatum would be pronounced.

SAN DIEGO, July 30.—Eight emissaries from Governor Cantu are due to arrive in Mexico City today or tomorrow with propositions to endeavor to reach an understanding with the Mexican provisional government according to high diplomatic officials.

It is understood it is planned to appoint a successor to Governor Cantu. The appointment must be approved by the emissaries, it is said.

BRITAIN'S PEACE PLANS CONTINUE

NOTE TO SOVIET RUSSIA URGES ARRANGEMENTS FOR PEACE CONFERENCE IN LONDON

(Special Service to Glendale Evening News)

LONDON, July 30.—While wireless messages from Moscow continue to bring reports of Bolshevik victories, the British government is progressing with plans to bring peace between Russia and Poland.

A new British note to the Soviet government made public today said that Great Britain is not in control of General Wrangel and is not responsible for his recent offensive.

The note urged Russia to authorize Keminoff and Krassin, representatives of the Soviet government to make preliminary arrangements for a peace conference here.

The Allied note to Russia from the Boulogne conference stated that the allies will consider the establishment of international relations with Russia following peace with the countries bordering on Russia.

DEMAND ACTION IN STRIKE CRISIS

ILLINOIS AND INDIANA COAL OPERATORS ASK UNION OFFICIALS TO END STRIKE

(Special Service to Glendale Evening News)

CHICAGO, July 30.—Illinois operators joined with Indiana producers today in demanding that union officials force a resumption of work on the part of the miners.

JIMMIE COX DAY

MIAMI VALLEY, OHIO, CELEBRATING IN HONOR OF THE DEMOCRATIC PRESIDENTIAL NOMINEE

(Special Service to Glendale Evening News)

DAYTON, O., July 30.—The Miami Valley is staging "Jimmie Cox Day" today. The celebration is being attended by thousands of boyhood friends of Governor Cox, Republicans as well as Democrats.

ESCAPES FROM SINN FEINERS

(Special Service to Glendale Evening News)

DUBLIN, July 30.—Brigadier General Lucas recently kidnapped by the Sinn Feiners, escaped today in a motor lorry at Oola, Tipperary. Two soldiers accompanying him, were killed when the lorry was ambushed by Sinn Feiners. General Lucas was taken to Tipperary military headquarters.

EXPLOSION IN FACTORY

(Special Service to Glendale Evening News)

PRAGUE, July 30.—Twenty-one persons were killed and 12 injured by an explosion in a munitions factory here today.

DUBLIN RAILWAY OFFICIAL MURDERED

(Special Service to Glendale Evening News)

DUBLIN, July 30.—Frank Broche, Chairman of the Dublin Southeastern Railway, was shot dead in his office here today.

CHOOSE GLENDAL

ELMER WILSON AND FAMILY PREFER CITY OF HOMES AS ABIDING PLACE

Elmer C. Wilson has moved with his family into the property he recently purchased of Mr. Brooks at 1131 East Chestnut street near what will be the Sycamore Canyon boulevard. Mr. Wilson was a newspaper man for many years and is now working for the American Type Founders' Company, Los Angeles branch. He had been living in Pasadena, but having been through Glendale many times he decided it was the place above all others in California where he wanted to own a home, so he finally bought. He has 108 feet frontage and a very deep lot, so there is plenty of ground for garden and fruit. Mr. Wilson and his family are especially pleased with Glendale as a city of homes, with no strict society distinctions based on wealth alone, as is the case in so many cities, and he predicts for it a continuation of the wonderful growth of the past year which has made it the wonder city of the west coast.

SCOUTS MEET

TROOP 2 HAS GALA EVENING—STAR AND MERIT BADGES AWARDED

A very important meeting of Troop 2, Glendale Boy Scouts, was held Thursday evening at the home of Scoutmaster H. Benj. Robinson, 407 North Louise street. Scout Executive Stanford B. Kellogg visited the troop and presented Burton Kuntzner with a Life Scout badge and a Star Scout badge. He is the second Star Scout in this troop and now has 14 merit badges. It is considered quite an event for a Scout to receive a Star badge for it represents a great deal of hard work and stands for a great deal. As far as is known there are only three Star Scouts in Glendale and Scout Kuntzner is the third one. Mr. Kellogg also presented Scout Kuntzner with merit badges in cooking, camping and first-aid, and merit badges in cooking and camping were presented to Scout Stillman Chase and a merit badge in interpretation to Scout Louis Steel. At the close of the meeting announcement was made of the hike to Glendale Week End Camp one week from Saturday.

ALL ABOUT QUAKE

EASTERN DAILIES BRING NEWS OF AWFUL DAMAGE HERE

The Chicago Tribune has not made its wide reputation as a humorous paper, but its recent issues as well as those of many of its eastern contemporaries, have caused wild hilarity among readers on this coast. The Tribune of July 16th tells all about the awful earthquake damage done in Los Angeles the day before, when buildings, great and small, tumbled in ruins and shrieking thousands rushed wildly along the streets holding boards or pieces of metal over their heads as umbrellas, to ward off the sky scrapers as they fell from above. Water mains were broken, electric lights put out, the older section of the city shaken to pieces and thousands of injured and fainting people overwhelmed the receiving hospitals. No mention was made of a tidal wave from the Los Angeles river sweeping over Normal Hill, strange to say.

That many eastern people believed these impossible stories, sent direct from Los Angeles by special correspondents, as the papers claimed, and topped with glaring headlines, has been evidenced by telegrams and letters received by residents out here from panic-stricken relatives back home. Mrs. H. F. Croft of 1753 Gardena, said she had received telegrams from her relatives in Chicago, asking if they should send her funds to live on till the family could get away from the stricken city and their ruined home.

Accompanying the veracious article in the Tribune, which occupied more than a column and a half, was a very correct map of the doomed city and environs, on which Pasadena is located several miles from the mountains, Van Nuys just about where Glendale should have been shown and Culver City where Watts should be. Possibly the earthquakes shook these cities loose from their moorings and moved them to the new locations.

TRUSTEES' MEETING

RECOMMENDATION OF ENGINEER OLMSTED PRESENTED TO BOARD BY CITY MANAGER

Board assembled at 9:30 p. m. July 29, 1920. Trustees Mrs. Bartlett, Henry, Robinson, Shaw and Stephenson being present.

The minutes of the meeting of July 22d were read and a correction ordered to be made on Page 127 in reference to Saturday half-holiday; with this correction the minutes were approved.

An application was read from Fire Chief A. H. Lankford, requesting that he be allowed to take a vacation of two weeks. On motion of Trustee Henry same was granted.

The City Manager submitted report recommending that applications for permission to remove trees be granted as follows:

H. W. Ross, 231 North Cedar. Wm. Prober, 448 W. Vine. Puente Oil Co., Los Feliz Road, east of San Fernando Road.

On motion of Trustee Bartlett the recommendation of the City Manager in regard to removal of trees was approved and permits granted.

The City Manager presented a communication calling the attention of the Board to the desirability of having certain streets resurfaced at the present time and recommending that the expenditure of the appropriation of \$3,490.00 for resurfacing previously authorized be expended at this time. On motion the recommendation of City Manager was approved.

The City Manager made a report in regard to the matter of sewage disposal, stating that he had obtained from Engineer Olmsted a concise statement consisting of recommendations as follows:

"In accordance with our understanding, I hereby set down in black and white a summary of our recommendation for proceeding with the Glendale sewage problem.

1. That a campaign of education be initiated at once and persistently followed for educating the voters of Glendale as to the actual condition of the city with reference to its sanitary requirements.

2. To have the consulting engineers and city engineers instructed to at once prepare plans and specifications for any one of the 12 local units suggested by this office as to temporary relief measure for the congested business district, as the interested parties may demand and be willing to pay for.

3. For the City Engineer to make whatever necessary detailed surveys are necessary for the installation of the desired units and to consult with this office as to the means for carrying out the desired improvements."

On motion of Trustee Stephenson, the matter was referred to the Committee of the Whole.

Communication was read from City Marshal Stanley recommending that the request of F. D. Myers of Glendale Heights asking for a permit to shoot rabbits on his own property be granted. After some discussion of the matter, on motion of Trustee Henry the request was denied.

On motion of Trustee Stephenson the City Manager was directed to furnish every member of the Board of Trustees with a copy of his report containing recommendations in regard to the sewer proposition, prior to the next meeting of the Board.

The time for filing protests against the proposed opening of Pat-

TRACTOR DINNER

COMMITTEES AND OTHERS WILL OBSERVE GET-TOGETHER MEETING AT WHITE INN

This evening at 6:30 o'clock at the White Inn will be held the Get-together dinner by the citizens of Glendale who are making arrangements for receiving the visitors who will attend the Tractor Show at Verdugo Woodlands, Glendale, September 20th to 26th. It is anticipated that one hundred men and women will have their places at the tables this evening, at which time reports will be heard from the various committees as to the best method to pursue to receive, house, and entertain the Tractor Show visitors. This is an occasion when all citizens of Glendale should unite in putting forth their best efforts to place Glendale before the world as being the most progressive city in the land. Guy Hall of Kansas City, Manager of the National Tractor Association and W. W. Rainey will deliver short addresses at 7 p. m.

The Buying Power OF YOUR DOLLAR Will Increase

Has it occurred to you that the dollars you save now will go twice as far in purchasing a home, automobile or other necessities when normal conditions return as they will now?

Every dollar you deposit today will be worth \$2 in buying power when prices drop. Appreciating the importance of this opportunity we urge you to open an account at this bank and add to it regularly.

Our officers appreciate your patronage and want your connection with this bank to be of benefit to you.

WE WANT YOU TO FEEL FREE TO MAKE USE OF

Glendale, Cal.

GIVE REAL COST

OWNERS OF NEW BUILDINGS
SHOULD TAKE OUT PER-
MITS FOR FULL VALUE

People who read carefully the list of building permits for new residences are struck with the wide divergence in cost prices given of houses of the same size. Of course, difference in materials, manner of construction and inside finish are bound to cause considerable variety of prices but it has been noted that a house of which the permit gave the cost as \$4000 has sold for more than double that amount and the value of the lot did not anywhere equal this difference. There are two unsatisfactory results from this. If the actual cost of the proposed building is not given, and the owner generally knows pretty nearly what it will be, or at least the minimum it can be, the city building department does not get the proper permit fee, and, in addition, the true value of our building activities is not given forth to the public. Thus a total valuation as given in the permits as \$200,000, doubtless means nearly \$300,000 in actual cost of construction.

EIGHTY DANCES ON THIS LIST

The Columbia Graphophone Company has gathered no less than eighty records of the latest dances for special summer use, and is distributing them this month. In addition to this, the August Columbia Records include half a dozen of the latest song hits sung by well-known popular comedians.

The Song Hits

Al Jolson imparts all his ideas about just the kind of wedding he'd like in "Some Beautiful Morning (I'll Find You in My Arms)," his latest song on a Columbia Record. He even gives the conversation which he anticipates will take place. This song is coupled with Frank Crumit's comic song, "I've Got Those Profiteering Blues."

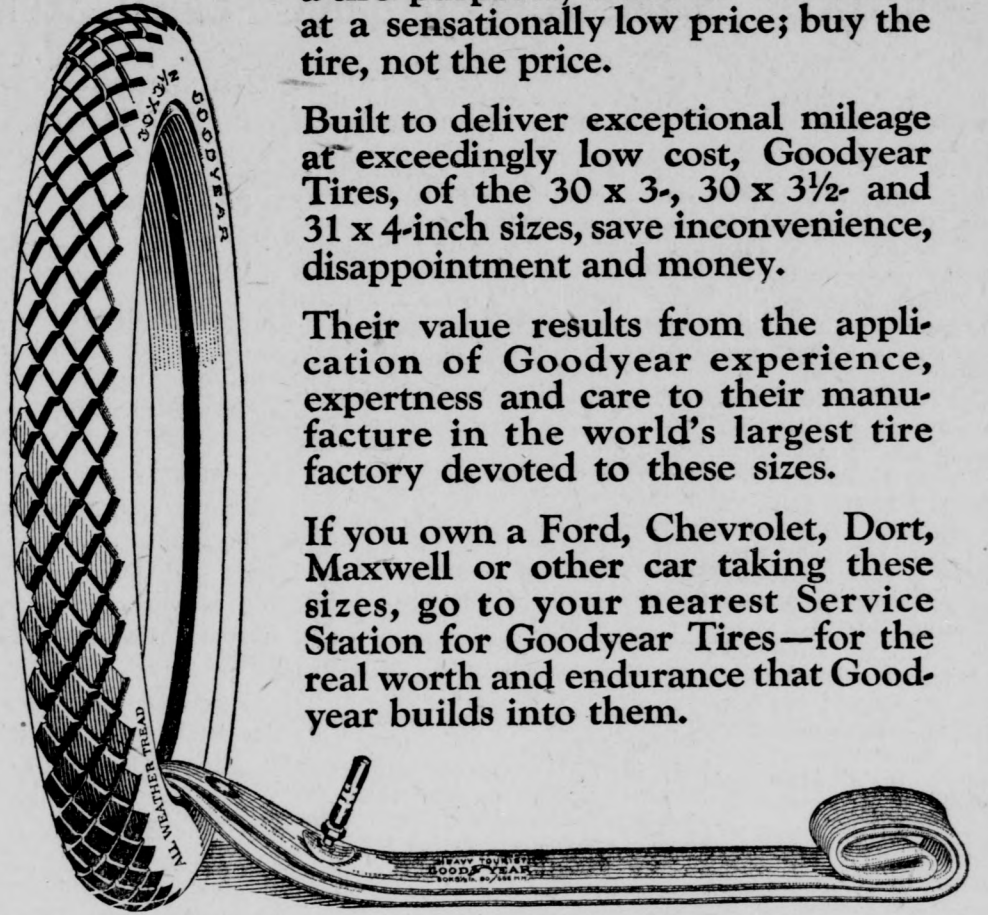

The Dances

The special list of dances for summer use issued by Columbia this month include 27 fox-trots, 15 medley fox-trots, 14 medley waltzes, 13 one-steps, 6 waltzes, 3 medley one-steps, 1 tango fox-trot, and 1 record of Neapolitan Melodies. These records are played by a great variety of the leading dance organizations.

Goodyear Mileage = and Tires for Small Cars

A well built tire yields much more mileage for each dollar of cost than a tire purposely made to be offered at a sensationally low price; buy the tire, not the price.

Built to deliver exceptional mileage at exceedingly low cost, Goodyear Tires, of the 30 x 3-, 30 x 3½- and 31 x 4-inch sizes, save inconvenience, disappointment and money.

Their value results from the application of Goodyear experience, expertness and care to their manufacture in the world's largest tire factory devoted to these sizes.

If you own a Ford, Chevrolet, Dort, Maxwell or other car taking these sizes, go to your nearest Service Station for Goodyear Tires—for the real worth and endurance that Goodyear builds into them.

L. C. BRAND'S NEW AIRSHIP IN SUCCESSFUL FLIGHT

L. C. Brand's new palace aeroplane was christened yesterday and given a very successful trial flight at Venice, where it was put together. It was named "Tioga Eagle," presumably in honor of Tioga Pass, near his Mono Lake ranch, said to be the highest pass in the world, nearly 11,000 feet, over which a regular paved road has been constructed. The name is appropriate, since the Tioga Eagle is expected to make the highest flights, six miles, ever attempted by a passenger aeroplane. The new monster machine will be kept in the palatial hangar at Mr. Brand's residence, North Glendale, when not on flights.

WEST POINT CADETS

ENLISTED MEN OF REGULAR ARMY TO BE GIVEN PREFERENCE

Appointments as cadets to the West Point National Military Academy are generally very eagerly sought by young men of military inclinations and the examinations attract very many candidates. According to a recent circular sent out by the War Department, enlisted men of the Regular Army are to be given every opportunity to compete in future examinations. Following is the text of the regulations for the selection of such for appointment in 1921; according to a notice recently sent to the Commanding General of the Western Department by the Adjutant General:

The candidates nominated for cadetship allotted to the enlisted men of the Regular Army shall not exceed three times the number of existing vacancies and shall be equitably distributed among the Territorial Departments by the War Department. If the number of applications in any Department exceeds the share allotted to it by the War Department, the candidates in such Department will be chosen from the successful competitors in a preliminary examination, held between December 1st and December 15th, such examination to be of a scope and nature similar to the regular examination for entrance to the United States Military Academy.

2. While it is impracticable at the present time to make the distribution prescribed, the number of candidates to be allotted to the Western Department will be large enough to make the competition well worth the serious consideration of any ambitious young man who desires a military career. There has never been a time since the passage of the law authorizing appointments from the Army when all the vacancies have been filled, and every candidate from that source who has qualified and who desired entrance to the Academy has been admitted. Although the Department cannot guarantee that this will be the case in the future, it is not believed probable that all the vacancies will be filled next year, so that any army candidate who qualifies may feel practically assured of admission.

3. The enlisted men to be selected must, at the date of admission, July 1, 1921, be between 19 and 22 years of age and must have served at least one year in the army as enlisted men, with the following exception: During 1921 any applicant "who has served honorably and faithfully not less than one year in the armed forces of the United States or allied armies in the late war with Germany, and who possesses the other qualifications required by law, may be admitted between the ages of 17 and 24 years." Prior service in the army, either by draft or by voluntary enlistment, or in the National Guard while it was in Federal Service, may be considered in determining an applicant's eligibility.

BIG INDUSTRY

(Continued from Page 1)

pany's factory by a high voltage electrical and quartz filtration process which produces one hundred per cent pure water without disturbing the natural elements. This is a great improvement over the distilling process which always denatures water to a certain extent and gives a flat and insipid taste.

The second idea of importance is the sweetening. There are various methods at the disposal of the manufacturer, but with quality in mind and regardless of cost, the Henry-Brown Company select the finest grade of pure cane sugar known to the trade as Confectioners' A.

This sugar is the first run in the process of refining, and is necessarily of very high grade. In appearance it closely resembles rock candy in a minute form.

Under the process used at the Henry-Brown Co.'s plant, this sugar is converted by highly scientific methods into a product known as "Invert Sugar"—a commodity which is recognized as one of the most concentrated foods known to medical science.

It is hard to overestimate the food value and stimulation contained in sugar in this form.

After this syrup is obtained the question of flavoring arises, and at this stage of manufacture ginger ales are made or marred.

The United States imports Ginger Root from Africa, China, Japan and Jamaica, but the manufacturers of Sierra Club consider the Jamaica variety superior to the others in qualities which go to make a high grade beverage.

This Ginger Root is specially selected, and is found to be mild and rich. There is a pleasing bouquet and a total absence of the disagreeable, burning flavors often found in other types.

There is a divergence of opinion at this point as to what constitutes a correct Ginger Ale, and the originators of Sierra Club have carried in mind a beverage which would blend

Our Building Plan Service

Glendale 10

the flavor of ginger with that of fruit.

This was obtained by adding small quantities of the juices of the orange, the lemon and the lime.

The faith of the originators in the correctness of this idea, has demonstrated itself through the substantial medium of ever-increasing sales.

In the short space of four years, this business has grown from a small local concern, to the largest beverage manufacturing company on the Pacific Coast.

It can readily be seen that Ginger Ale manufactured under the above conditions, with up-to-date and sanitary bottle washing and filling machinery is going to supply a need.

It not only quenches the thirst and supplies food energy direct to the system; it is also very delicious to drink and is consumed and enjoyed by children as well as adults.

AMERICAN SOCIETY THE BEST

SAN FRANCISCO, July 30.—(United Press.)—David Starr Jordan, president emeritus of Stanford University, in an address Tuesday before the National Industrial Peace and Educational association's conference here, declared that American society, whatever its faults, is the best the world has ever known. "And it grows better with each generation," he added.

Discussing industrial unrest, Dr. Jordan declared strikes and lockouts must be abandoned in the interest of common human rights.

On the subject of American society, he had this to say:

"To improve it is not to break it up. Thousands of good men and women have agonized and died to make it as good as it is. Moreover it grows better with each generation and above all it holds within itself the power peacefully to remove every defect its members recognize. Violence sets it back and progress of civilization is away from forces toward voluntary co-operation as the basis of society."

These principles, Jordan said, also apply to our labor disputes.

"Antagonism between capital, labor and management cannot persist," he declared. "These three are allies in production and it is the part of management to make them all friends. Success in this regard is the test of efficiency. Discord is largely of old world origin continued by old world methods on both sides. "A democracy knows no caste nor class. Capitalist, bourgeoisie, proletariat are foreign appellations which fit nobody in this country where we are all plain citizens."

The trade union, he said, must be

Our Delivery Service

Is a hot weather aid for the housewife. We make a feature of our delivery service and the selection of meat for our patrons who order by phone.

If it's too hot to come down town give your order by phone—we'll soon convince you that your meat has been as carefully selected as if you had done it yourself. And we'll get it to you when you want it, too.

in time, not a restraint on liberty, but a trustworthy and responsible agent for collective bargaining. It cannot remain a government within a government, he added.

"Each employee is entitled to a degree of permanence in service, each employer to a corresponding continuity." He said: "The waste of sudden breaks falls on both and still more on the people at large. The long remedy lies in personal conciliation and fair play.

But this cure is not yet in our hands. No strike succeeds in the long run without popular approval. To make public opinion just it must be educated. Here lies the argument for compulsory investigation. If people know the truth, they will know what to do about it."

WE CAN DO IT

- ¶ This should be Glendale's slogan when the question of furnishing the necessary dwelling places for all the people who wish to live here, is being considered.
- ¶ From a social standpoint we need these people. Those who are seeking homes here make up an excellent and desirable class, people who will help maintain the high moral standard of the city.
- ¶ From a business standpoint we need them in order to continue our growth.
- ¶ From any point of view, looking at the matter selfishly or unselfishly, we want new residents.

We Can Provide Homes For Them If Everyone Who Is Able To Do So Will Assist

- ¶ We are at the service of those who wish to help along the movement to provide Glendale with more homes. We have been building up a strong organization of architects, engineers, and craftsmen of every kind who have the art of building down to the fine point.
- ¶ If you have a vacant lot or two or want to make an investment we should like to make connections with you.

STATE REUNIONS

THREE OF THEM TO BE HELD SOON, WITH MANY FEATURES

As many former residents of the states named below live in Glendale now, the Evening News is glad to give notice of the reunions to be held soon.

Colorado

All who ever lived in Colorado are called to meet under the auspices of the Colorado State Society of Southern California for the great picnic reunion, all day, Saturday, August 7th, in Sycamore Grove. Come as early as you can and spend the day with friends. There will be a brief program, opening about two o'clock, but the main purpose will be to have a good time. Bring your baskets well filled and share with friends. Coffee will be served free to all who buy the souvenir badges. Each one who learns of this picnic is asked to pass the word along.

Nebraska

All who ever lived in Nebraska are called to meet under the auspices of the Nebraska Association of Southern California for the great picnic reunion, all day, Saturday, August 7, 1920, in Bixby Park, Long Beach. There will be county registers and headquarters so you can find the old neighbors even with ten thousand present. There will be a brief program, opening about two o'clock. Bring your baskets well filled and share with friends. Coffee will be served free to all who buy the souvenir badges.

Iowa

The great annual Summer Outing and Picnic Reunion of the Hawkeyes out in California is held each year the second Saturday in August, coming this time the 14th, and it will be in beautiful Bixby Park, Long Beach. The Hawkeyes will rally from all parts of our Southland and from hundreds of towns will come the old friends. It will last all day and each one will bring his basket dinner, cup and spoon. After dinner will be a brief program, but the day is given over mainly to the jolly social time. There will be headquarters open all day for each county, ninety-nine picnics, going on at once, and the college reunions will be three to four o'clock.

THE EVENING NEWS OFFICE IS OPEN FOR BUSINESS FROM 6:30 O'CLOCK A. M. TO 9:30 P. M. EVERY DAY OF THE WEEK EXCEPT SUNDAY. 139 SOUTH BRAND BOULEVARD. PHONE GLENDAL 132.

INDUSTRY IS A HABIT

This editorial has nothing to do with the troubles of capital and labor. So read on.

Up in a little village in New York is an old man, claiming 83 years of life. Now, when most men get to be 83 they like to sit on the veranda and smoke or dream of the past. But not so with this one. Gardening is his hobby. For the last several years he has had good-sized gardens. Every year he increases it in size. "I tell my daughter," says he, "that I'll have a farm by the time I'm 100." And probably he will.

For this man has the habit of industry. His garden has grown to be more than an acre, which is not so much unless you have to hoe every bit of it—then it takes on astonishing proportions. Early in life this man acquired the habit of industry. At few times has he worked terrifically hard as some know it these days. At no time has he loafed. He has kept at it.

The result is that his body is good for many years yet. The habit of industry has kept him physically and mentally in tune. His life is happy because he enjoys every minute of it. He knows more about weeds and bugs and soils in a practical way than the average agricultural college graduate.

In short, his habit of industry has made his life successful from any angle you care to look at it. He is a living preachment of that habit. What a greater, happier, more contented nation this would be if everyone cultivated the habit of industry!

GERMANY RECOVERING TRADE

Germany is withholding statistics of her trade with foreign countries from publication. Figures, announced in Berlin, showing that Germany's trade with England in February and March left a balance in the former's favor, add significance to this. In view of the plea for raw materials which Germany has been making almost since the signing of the armistice, it became expedient to prevent comparisons of her imports and exports being made for the present.

Germany came out of the war with her manufacturing plants intact, and it is reasonable to assume she will have a rapid recovery, if given the chance. Consequently it is little wonder no further comparisons in her trade with England are made, in the light of her constant plea for raw materials.

It is likely that in the near future Germany will become a considerable factor in commercial competition with other nations in the sale of her goods. Germany is better off today, regardless of the indemnities she must pay, than France or England, for instance.

But having lost the war and been punished, she will seek in some way to pay the debt, whether by fair means or otherwise. Her struggle to come back will be watched with interestedness by all nations. Whatever she does she must do fairly.

Prohibitionists charge that the Republicans have omitted the law and order plank that was read in the draft of the platform adopted at the convention. That is the missing plank where the platform says, "Watch your step."

Absence of sharks along the beaches this year may be accounted for by their presence in the oil fields.

KEEP COOL

- There are many aids to comfort in hot weather.
- Use Pyrex ware and save dishwashing by serving hot things in the dishes in which they were cooked.
- Make daily use of a White Mountain Ice Cream Freezer and know the comfort of frozen salads and desserts.
- A Save-Labor Churn, plenty of sharp kitchen knives, spoons, etc., all make work easier and pleasanter and help to keep you cool.

A CURE FOR LEPROSY?

Has medical science, after centuries of failure, finally conquered leprosy, most dreaded of diseases with which humans are afflicted?

The disease can be cured, declares Dr. F. H. Parker, who has charge of the Penikese Island, Mass., leper colony. Specialists from New York and Boston have gone to the colony to make examinations that will reveal whether his claim of having cured two young men after three years' treatment are based on accomplishment.

Chemulga oil, imported from India, has made the dream of the medical profession come true, declares Dr. Parker. The oil comes from the India plum tree. After the three patients took the Indian oil for two years, during which time they were given the same treatment of fresh air, food, etc., as tuberculosis patients, tests showed negative results, that is, there was no trace of the disease. If the tests to be made by the specialists bear out the belief of the state authorities two men who were practically sentenced to confinement for life will be released.

It will be a great day for medical science when it can announce to the world that it has conquered the most dreaded and abhorred of all diseases.

HONOR BRIDE-TO-BE

MISS VIVIAN ENGLE PLEASANTLY SURPRISED BY S. S. CLASSMATES

A surprise, in the form of a miscellaneous shower, was given Miss Vivian Engle of 814 East Harvard, at the home of Mrs. J. R. Baker, 331 North Maryland avenue, last night. The Philathea class of the Presbyterian Church, of which Miss Engle is a member, planned the affair so well that when the guest of honor appeared on the scene, the entire party of 26 were on hand to greet her. Immediately on her arrival the wedding march from Lohengrin was struck up by Mrs. J. Mac MacMillan, and the merry party formed a march around the dining-room table which was covered with gifts of all descriptions, singing "Here Comes the Bride." Next the surprised young lady was seated at the mock wedding feast of gifts, which were arranged to represent the different courses, and serve as dishes, napkins, etc. After due inspection of gifts and reading of verses attached, the evening was further enlivened by guessing contests, clever stunts and the offering of fanciful bits of advice to the bride-to-be.

One of the "bits of verse" referred to above was by Mrs. G. B. Porter and read as follows:

When I was asked to come to your shower,

I said, "Here's where we have some fun for an hour."

So I bro't along this mop-stick for you;

You know how to use it, of course you do.

When the days are busiest, when you've lots to do

I hope John will say, "Let me mop for you."

A word of praise and then a smile Will help him to do it twice in a while.

You get him something good to eat— Mash the potatoes or fry the meat. And when you sit down to "break the bread"

You look at John, and bow your head,

The thanks you give must come from the heart.

Be sure to do this right in the start. "God is able," our motto has been

Willing and able to keep you from sin.

Long life and happiness, we wish you with cheer,

If you both love the Father, there need be no fear.

The Philathea class colors of blue and white were carried out in the living room and in the dining rooms, red dahlias and crepe decorations suggested the nature of the occasion which the tiny red hearts emphasized. Refreshments of ice cream and heart-shaped cakes in the colors of red and white were served at the close.

Miss Engle, who is to be married soon, is very popular with the young people of her circle, especially in connection with church work and for her great musical ability.

Her fiancé, Clarence Scates, is located in Antelope Valley, where he has a farm.

Those present were: Miss Vivian Engle, the guest of honor; Misses Marie Meyer, Maurine Baker, Mae Lyon, Ethel Worthington, Ella Doctor, Vera McGill, Ethel Preston, Phyllis Baker, Marjory Smith and Mesdames Guthrie Boyd, William Boyd, J. W. Cooper, A. F. Van Ornum, J. Felix, Geo. Lemon, Roy King, L. M. Richardson, J. Mac MacMillan, Clifford Riggs, Etta Gibbons, W. E. McCormick, Glenn Porter, J. H. Lord, J. R. Baker.

Bentley Built Bungalows

Bentley-Built homes are numerous in Glendale but more are needed. Why don't YOU build? There is no reason why you shouldn't own the home you live in; or receive a tidy income each month from the rental of a house we might build for you.

Bentley's Building Service

enables you to build a home with the minimum of trouble and responsibility on your part and on the easiest possible terms.

WHEN YOU HEAR OUR PROPOSITION

and see the hundreds of photographs of completed homes we have on file, each with its floor plans accompanying it; when you understand how complete is our service and how much responsibility we take from the shoulders of our clients you will be ready to build at once.

FOR SALE

Furnished Bungalow

Lots of Ground

50x280

Beautiful shrubbery, lawn, flowers, rose bushes, fine vegetable garden, variety of fruit trees, 17 laying hens, 19 chicks and a few rabbits.

First class modern bungalow of 6 rooms with 3 bedrooms and attractive breakfast nook. Choice fixtures, costly curtains and draperies; bedrooms, bath and kitchen in white enamel; woodstone drain, large cement basement, garage with cement floor and drive.

It is completely furnished, (only reservations being part of silverware, cut glass and china,) including bedding, cooking utensils and books.

The rugs are expensive Wiltons and one imported Scotch wool.

Four pieces of mahogany, an overstuffed leather chair and a new \$250 Brunswick Victrola adorn the living room, and the dining room keeps pace with a beautiful walnut set including 6 chairs and a tea table. One bedroom is furnished in ivory with dresser, chairs and lady's dressing table, and another is in mahogany.

Besides the complete kitchen equipment with an excellent gas range, there is a new electric washer. Everything is in the best of condition being practically new.

This property is located on the best residential street in Glendale, only one block from the Brand Boulevard car line.

THE PRICE IS RIGHT.
\$6500 is a conservative valuation of the bungalow, the furnishings are worth more than \$3000 and an extra lot with 50 feet frontage on Brand Boulevard is certainly worth \$1500.

All for \$10,000 and it only requires \$3000 down with balance at 7 per cent.

If you want to see this bargain come to 139 North Brand Boulevard or telephone Glendale 250.

E. P. HAYWARD

Personals

M. J. Sanford has moved from 417 North Maryland to Los Angeles.

E. E. Hitchcock is having a four-room house built at 1233 Boynton to cost \$1000.

Stanley Woodyard of 454 Vine St. is spending a three-weeks' vacation in Sacramento.

F. Christman is preparing to move into his newly-built residence in Glendale Heights.

Mr. and Mrs. P. J. Priault of 128 West Park avenue, are going to Santa Monica Sunday to spend two weeks.

Mr. and Mrs. Hartley Shaw and family of 212 West Park avenue, returned from San Diego Monday night.

C. P. Rock and wife, who recently sold their home at 345 West Lomita avenue, have moved to 116 E. Chestnut.

Walter Jones of 430 Vine street went to Philadelphia last week to attend the funeral of his sister, Miss Carrie Jones.

Mr. and Mrs. W. G. Black of Ontario, former residents of Glendale, are visiting friends and neighbors in South Glendale.

Walter Burger is having E. M. Bolton build for him a fine seven-room residence at 314 North Central avenue, to cost \$7000.

Spencer Robinson is having another 3-room house built on East Lomita, at 1011. It is to cost \$1575 and Manuel McLain is the builder.

Mrs. Bertha Hofner Ginger is having the large house on the rear of her lot at 130 South Adams street moved forward and remodeled.

Fred Volkhart of 307 West Lomita avenue is building a 3-room house on a lot he owns at 601 Vine street. The contract price is \$1400.

Mrs. Wm. Trober of 448 Vine St. is entertaining her sister, Mrs. Gordon Joyce and infant daughter of Palmyra, New York.

A stray dog invaded F. H. Vesper's premises, 321 East Lomita avenue, Wednesday, and killed six fine chickens before he could be driven off.

T. J. Fambrough is clearing off his lot at 225 Milford street, preparatory to starting the erection of a 5-room Colonial bungalow. He has already built and sold several houses in Glendale. He has also commenced a 5-room house at 224 South Orange. Each is to cost \$3000.

Miss Lavera Kitterman of 311 N. Kenwood, departed the first of the week for an extended visit in her former home town, Hay Springs, Neb. She will also visit friends and relatives in the southeastern part of the state before returning to her home in Glendale.

Fred Osbury's car was taken from where he had parked it on South Maryland avenue, Thursday night, but was found yesterday. A young man by the name of Nelson took it for a joy ride and damaged it somewhat before he was apprehended and the car recovered.

W. S. Rattray, the well-known advertising man living at 405 West Lexington Drive, is now driving a fine new King Eight. Previous to buying this he sold the Buick he had driven 32,000 miles for \$1500 more than he paid for it and the buyer is very well satisfied with his bargain.

Mr. and Mrs. E. L. Knox and their party consisting of Captain and Mrs. Walter Fletcher Smith, Misses Alice Smith and Gertrude Noll returned Wednesday from their trip to Yosemite, having made stops at Fresno and Bakersfield on the way home. Their visitors are now on their return to Cuba, going by the way of Salt Lake and Yellowstone Park.

We are apt to think Glendale considerably "spread out" when looking at a city map with its wide stretches of ranch land to the northwest, north and northeast, but little Burbank beats us on that. Glendale with its 15,000 population has an area of 10 square miles, 64,000 acres, while Burbank with about 5000 has 12 acres of territory, or 76,800 acres.

Mrs. Minnie Patterson of 363 Riverdale Drive, who recently returned from a trip to New Jersey, where she visited her former home, Hollingswood, and other places, is entertaining her aunt, Mrs. Mary S. Cox, of Philadelphia, who accompanied her on the return trip. A party composed of Mrs. Patterson and Miss Emma, Mrs. Cox and Mr. and Mrs. Lyons, spent a few days together at Catalina.

James H. O'Connell of Nashville, Tenn., returned to his home Thursday, after a visit of a week with his mother, Mrs. Mary B. O'Connell, and sister, Mrs. C. E. Norton, of North Maryland. Mr. O'Connell is a prominent business man owning one of the largest engraving houses in Nashville. He was favorably impressed with Southern California in general and Glendale in particular, this being his second visit here. His coming was a joyous surprise to his mother and sister and the week of visiting went all too quickly.

SPIRITUALISM

???

What About the Ouija Board?

COME EARLY!

Mrs. J. W. Moody and daughter, Miss Maude, have gone to Santa Ana and San Diego for a few weeks.

Mr. and Mrs. J. E. Rohrbough of 324 Pioneer Drive have sold their home and are moving Monday to Long Beach.

Mr. and Mrs. W. S. Gamble, Marian Gamble and Mrs. H. C. Langford of South Glendale avenue left today for Venice where they will spend a week.

Miss Emma Rapp and her mother from Council Bluffs, Iowa, are visiting Mrs. H. N. Sayre at 914 South Central avenue. The Rapps are old friends and neighbors of the Sayres and will likely spend some time at the beaches before returning home. Miss Viola Sayre is expected home from Cleveland, Ohio, soon to spend her vacation in Glendale.

HAPPY BIRTHDAY PARTY

A birthday party in honor of Miss Ruth Hunt of 459 West Maple St. was given at her home Wednesday evening. There was no formal program, but games, music and dancing were enjoyed by the sixteen girls who were there. Refreshments of ice cream and cake were served. The guests were Misses Agnes Thaxter, Dorothy Crook, Genevieve Straight, Emma King, Elizabeth Sweet, Agatha Leunberger, Anna Meriken, Jane Fritch, Eleanor Kopp, Edith Dutcher, Ruth, Jessie, Wilma, Anna May and Alberta Hunt of Glendale, and Mildred Christie of Hollywood.

MORE VANDALISM AT CATHOLIC CHURCH

Rev. James S. O'Neill reports that the Holy Family Catholic Church has again been desecrated by vandals. Yesterday afternoon the box in which offerings are dropped for the poor, was broken into, and the vestry also was disarranged and articles pulled about. A gold pyx shaped like a watch case and engraved with a large cross was taken. The pyx is used to carry communion to the sick. Rev. O'Neill feels that there should be some way to stop such vandalism.

CUT PRICE SALE MOVES MERCHANDISE AT H. S. WEBB & CO. STORE

Our cut price sale on many lines of merchandise is still moving out the goods. One of the most attractive offerings this week is a line of Georgette and Crepe de Chine blouses at \$4.95. These waists were purchased for this sale and are worth from \$7 to \$8. See them in the window. These sales were inaugurated to show our appreciation of the generous patronage of Glendale people and to make it unnecessary for them to go out of town to get the benefit of lower prices. H. S. Webb & Co.—Adv.

TRUSTEES' MEETING

(Continued from Page 1)

terson avenue having expired on July 28th, the said protests were presented to the Board by the Clerk and on motion referred to the City Engineer to check up and report in regard to the frontage represented by the same.

Demands were presented and referred to the Finance Committee. Later the Finance Committee reported back demands approved and on motion of Trustee Stephenson warrants were ordered to be issued in payment of the same.

Trustee Robinson made a motion which was seconded and carried that when the Board adjourn it be to meet at 9:00 a. m. August 2, 1920.

The City Engineer presented map of Tract No. 3610, recommending its adoption and on motion of Trustee Stephenson the same was adopted by Resolution No. 1110. The City Engineer presented a map of Tract No. 3727, recommending its adoption and on motion of Trustee Henry recommendation was adopted and map approved by Resolution No. 1111.

The City Manager presented resolutions in regard to lot cleaning and the same were on motion of Trustee Stephenson, adopted as Resolution Nos. 1112, 1113 and 1114.

The Engineer of the Public Service Department reported having received a letter from the General Passenger Agent of the Pacific Electric Railway Company in which that company agrees to furnish to school children in Glendale commutation tickets at reduced rate similar to the same furnished in other communities.

The Engineer of the Public Service Department reported the completion of new well on San Fernando Road, stating that the same had not yet been tested as no bids have been received in reply to the advertisement requesting same. Trustee Stephenson made a motion that "Whereas the public interest and necessity requires that connection of pump to the new well on San Fernando Road be made as soon as possible and a pump house erected over the same, that the Public Service Department be authorized and directed to do this work by day labor and to purchase the material necessary for the same." Motion was seconded and adopted.

The Engineer of the Public Service Department presented plans and specifications for the reservoir on Verdugo Road. He stated that he had estimated the cost in detail and owing to the advance in wages and material during the past year, prices are much higher now than when he had previously reported on the matter and that the estimated cost of the improvement, including the cost of the site, is \$70,000.00. On motion of Trustee Henry, the plans and specifications for reservoir as presented by the Engineer of the Public Service Department were approved and adopted.

Trustee Stephenson presented the following resolution and moved its adoption: "That because of the charges against Officer Trautwein, which charges the Board find to be true, but in connection with which mitigating circumstances exist, that the said officer be further suspended for a period of two weeks without pay and at the expiration of said period, Officer Trautwein be restored to full duty." The motion was duly seconded and adopted.

The City Engineer reported in regard to protests against the opening of Patterson Avenue, that they represent approximately 1000 feet of frontage, the total in the district proposed to be assessed amounting to 30,000 feet. On motion of Trustee Bartlett, it was ordered that the hearing in connection with these protests be set for August 19, 1920, at 8:00 o'clock p. m. and that the Clerk be instructed to publish notice of the same as required by law.

Mrs. Chauncey Lake is visiting her sister, Mrs. Haskins, in Santa Monica. They are occupying their summer cottage which is located about five miles up the coast.

Health Is Possible!

Chi-ro-prac-tic takes off the brakes. Nerve pressure prevents the flow of vital force. Chi-ro-prac-tic takes away the cause—Nature then produces the desired effect. Whenever vital organs work badly or you have so-called trouble with your heart, lungs, bronchial tubes, stomach, liver, kidneys, intestines, bladder, uterus, etc., Chi-ro-prac-tic has shown that the spine or back-bone is almost invariably at fault. The proof lies in the thousands of cases successfully handled by Chi-ro-prac-tic.

AFFECTIONS OF any of the following parts may be caused by nerves impinged at the spine by a subluxated vertebra:

BRAIN
EYES
EARS
NOSE
THROAT
ARMS
HEART
LUNGS
LIVER
STOMACH
PANCREAS
SPLEEN
KIDNEYS
SMALL BOWEL
LARGE BOWEL
GENITAL ORGANS
THIGHS & LEGS

SPINE OF MAN

The quickest and safest way to overcome so-called internal bodily disturbances of any kind is by Chi-ro-prac-tic spinal adjustment to the particular joints of the backbone, which by their displaced conditions interfere with the passage of the Creator's vital force through the nerves to the particular organ concerned.

LIFE AFTER DEATH

EVANGELIST PROUT POINTS OUT BIBLE TEACHING ON IMMORTALITY

The audience present at the Gospel Tent last evening gave evidence of an increasing interest in the subjects being presented by Evangelist C. S. Prout. The Divine decree, said the preacher, concerning man is: "Dust thou art, and unto dust shalt thou return." Gen. 3:19. In common with everything else that has life, in death there is a return to the natural element. The minds of many are perplexed concerning the resurrection as to whether the identical particles of the body are restored. That matters not, because the dust differs not. Organization, and not the identical particles, is what makes the difference in us as individuals. Our personality is thus preserved.

Life is stored up in the minute cells of the body. God, not nature, is its author. We maintain it by conforming to the laws which govern its expression. When it has spent itself, we cease to function. Immortality has not been bestowed upon us in this mortal state. The word "immortal" is used only once in the Scriptures and is applied to God. 1 Tim. 1:17. "Now unto the King Eternal, immortal, invisible. . . ." and the same writer declares concerning God, that He "Only hath immortality, dwelling in the light which no man can approach unto." 1 Tim. 6:16. If men claim to have immortality by the act of creation, then their claim conflicts with these positive statements. We should also conclude that the other attributes of God pertain to man if this one does.

The congregation was asked to repeat the familiar verse, John 3:16: "For God so loved the world that He gave His only begotten Son, that whosoever believeth in Him should not perish, but have everlasting life." Here it was pointed out that the life immortal was a gift of God only through Christ. That the gospel Seventh-day Adventists believe, declared Mr. Prout. Jesus affirmed, "He that heareth My word and believeth on Him that sent Me hath everlasting life. . . and is passed from death unto life." It is for believers only. But "the soul that sinneth shall die." Ezek. 18:4, is the antithesis of this. The second death awaits those who receive not Christ as the life-giver.

"Let not sin reign in your mortal bodies," said Paul. Man is designated as "mortal man." Job 4:14. Christ bridges the gap and links us up with Heaven and God. At His coming "we shall all be changed." "This mortal must put on immortality, then shall be brought to pass the saying: Death is swallowed up in victory. . . Thanks be to God who giveth us the victory, through our Lord Jesus Christ." 1 Cor. 15:53-57.

An interesting feature of these meetings is the many questions that are being handed in. This rivals a desire to know more of what the Scriptures say rather than the teachings of men upon live, important subjects.

The topic for this evening is "Spiritualism—Who Are the Spirits?"

Old mattresses made like new. Rugs cleaned and sized. Fluff Rugs made from your old carpet, also Rag Rug weaving and rugs dyed. Mattresses for sale.
PHONE GLENDALE 1928

The city employe in charge of the San Fernando pumping plant reported that a man brought a pair of new auto tires to him last night and offered them to him for \$10. Pretending he had not enough money with him, the employe said he'd give him a dollar down and the remaining \$9 in the morning, hoping to thus secure his arrest. He failed to come back, however. It was thought that possibly this was one of the gang that later shot two Burbank officers, killing one.

ENDEAVORERS

The Christian Endeavorers of the Glendale Presbyterian Church visited the Midnight Mission on Los Angeles street Wednesday evening and had charge of the services from 8 to 10. Three cars with fifteen of the young people composed the delegation and after having an opening service of song and testimony Mrs. Fannie Marple Retts sang two solos and D. S. Foster gave the message of the evening. The Midnight Mission is located in what is known as "Hell's Half Acre" in the city of Los Angeles and is doing a great deal of good in giving real assistance, physical, moral and religious, to those who come within its reach. The young people enjoyed the service and derived much good for themselves, as well as helping to bring happiness to others.

Sierra Club Beverages

What Is a Bottle of Sierra Club Ginger Ale?

Eight ounces of the purest, coolest water. One and one-half ounces of pure cane sugar, flavored with Jamaica ginger, and juices of the orange, the lemon, and the lime. Clear, sparkling and invigorating—not too gingery—but mild with a pleasing bouquet! Enjoyed by the whole family—not the old "pop" idea, but a clean, pure, drink, having food value that digests naturally, and quickly stimulates the system.

Order it by the case—delivered direct to your home. Price \$3.45 for 24 bottles—including a deposit of \$1.35 for the case and bottles, which is refunded when they are returned.

READ BIBLE 23 TIMES

An aged Pennsylvania woman died the other day after having finished reading the Bible through for the twenty-third time. Her assiduity was probably a record, but it is not so remarkable that a person should read a book 23 times, as that a book should be worth reading that often.

The Bible is still the world's "best seller," and is in no danger of being displaced. And when we consider the wealth of inspiration, information and beauty that the good book holds for us, we fail to wonder that for some of our greatest men it has been a daily life-long companion, nor that folks everywhere, of all ranks and conditions, turn to it with never ceasing delight.

More than a source of moral and spiritual guidance, the Bible is a great history. If you don't believe it contains some of the most beautiful poetry ever written in any tongue, re-read the Psalms. Some of the world's greatest short stories are told in its pages, outstanding among which are the vivid narratives of Ruth and the Prodigal Son. It contains some of the greatest orations in literature. Paul's speech before Agrippa has never been excelled.

It is not strange that the Pennsylvania woman should have read the book 23 times. The knowledge and breadth of view attained through a study of the book of books surely must have made life happier and more worth while.

OLD CROW RANCH

ONCE BEAUTIFUL PEACH OR-
CHARD NOW HEART OF
THE CITY

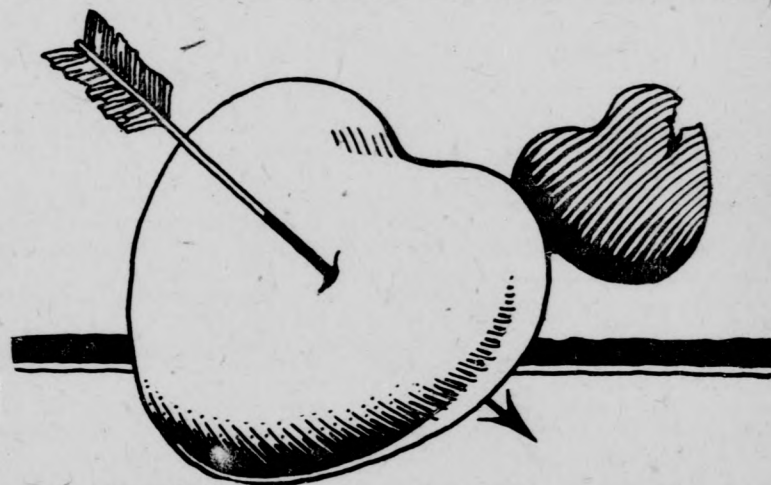

Peaches are now ripe on the Crow ranch. The orchard will not be crowded with eager pickers of the luscious fruit, as in days of yore when the trees, in long, straight rows and bending beneath the burden of the red-cheeked peaches, covered several acres of ground. Only a few of those old trees still stand, and where they are on cultivated ground and still cared for, their fruit is as delicious as it ever was, but most of them have either given way to the march of progress, or, gnarled and broken, stand here and there on vacant lots, a mere shadow of their once leafy, fruit-filled glory.

The Crow ranch of the '80s comprised all of the present city of Glendale bounded now by Glendale avenue, Broadway, Central avenue and Windsor Road. The southern half of it was afterward owned by Mr. Goodell, who died a few years ago after selling nearly all of his holdings, which he had subdivided into lots. The present Lomita avenue was then the road across the ranch, with outlets through gates at Central and Glendale avenues. The eucalyptus that now tower a hundred feet in air, were set out on either side of this road by Mr. Crow. The east half of the ranch was in peaches and the west half in navel oranges. Much of the fruit went to waste in the early days because of the lack of facilities for marketing it.

The old peach orchard is now the heart of Glendale and the slender trees bordering the old dirt road of those days are now the giant eucalypti that mark the boundaries of the smooth paved street, Lomita avenue.

PALMER SEEKS SUPERIOR JUDGESHIP

Judge Harlan G. Palmer, one of the Justices of the Los Angeles township court and editor of the Hollywood Citizen, has announced his candidacy for the Superior Court, entering the primaries for nomination for the short term. He seeks this position on the strength of his record as Justice for the past five years. Judge Palmer was president of the Southern California Editorial Association for three years and has been prominent in Los Angeles civic affairs, always displaying high principles, fearless judgment and splendid ability.

Troubled Hearts —

Sad, heart-weary
women, read—

Let the strong, kindly guiding hand of Cheery Anna lead you safely back to paths of happiness and contentment. In her daily interviews with Examiner readers, she "patches up" lovers' quarrels, cures aching hearts and relieves troubled minds.

The benefits of her wide experience, kindly nature and gifted pen are furnished to readers of The Examiner every day in the year.

If your heart is troubled—let Cheery Anna soothe it for you with the balm of her friendly sympathy.

ORDINANCE NO. 389

AN ORDINANCE OF THE BOARD OF TRUSTEES OF THE CITY OF GLENDALE ESTABLISHING THE GRADE ON MAPLE STREET, MARIPOSA STREET, ELK AVENUE, OAK STREET, HARVARD STREET, AND KENILWORTH AVENUE, ALL WITHIN THE CITY OF GLENDALE.

THE BOARD OF TRUSTEES OF THE CITY OF GLENDALE DO ORDAIN AS FOLLOWS:

Section 1. That the grade of that portion of Maple Street from a point three hundred and sixty-three and forty one-hundredths (363.40) feet east from the easterly line of Everett Street to the westerly line of Verdugo Road, be and the same is established as follows:

At a point on the northerly curb line of Maple Street three hundred sixty-three and forty one-hundredths (363.40) feet east of the easterly line of Everett Street the elevation of the grade shall be 524.01 and 523.18 on the southerly curb directly opposite thereto.

At the intersection of the northerly curb line of Maple Street and the westerly line of Adams Street the elevation of the grade shall be 529.96.

At the intersection of the southerly curb line of Maple Street and the westerly line of Adams Street the elevation of the grade shall be 529.09.

At the intersection of the northerly curb line of Maple Street with the easterly line of Adams Street, the elevation of the grade shall be 530.21.

At the intersection of the southerly curb line of Maple Street with the easterly line of Adams Street the elevation of the grade shall be 529.22.

At the intersection of the northerly curb line of Maple Street with the westerly line of Sycamore Canyon Road the elevation of the grade shall be 528.63.

At the intersection of the southerly curb line of Maple Street with the westerly line of Sycamore Canyon Road the elevation of the grade shall be 527.69.

At the intersection of the northerly curb line of Maple Street with the easterly line of Sycamore Canyon Road the elevation of the grade shall be 528.65.

At the intersection of the southerly curb line of Maple Street with the easterly line of Sycamore Canyon Road the elevation of the grade shall be 527.53.

On the northerly curb line of Maple Street one thousand sixty (1060) feet east of the easterly line of Sycamore Canyon Road the elevation of the grade shall be 533.50 and 533.00 on the southerly curb line directly opposite thereto.

On the southerly curb line of Maple Street sixteen hundred and seventy (1670.00) feet east of the easterly line of Sycamore Canyon Road the elevation of the grade shall be 542.60.

On the southerly curb line of Maple Street sixteen hundred and forty (1640.00) feet east of the easterly line of Sycamore Canyon Road the elevation of the grade shall be 541.70.

At the intersection of the northerly curb line of Maple Street with the westerly line of Verdugo Road the elevation of the grade shall be 541.93.

At the intersection of the southerly curb line of Maple Street with the westerly line of Verdugo Road the elevation of the grade shall be 540.18.

That between the above designated points the elevation of the grade shall conform to the straight lines joining these points in the same side of Maple Street excepting that the points of intersection of the grade lines on the north and south curb lines ten hundred sixty (1060.00) feet east of the easterly line of Sycamore Canyon Road and on the south curb line sixteen hundred forty (1640.00) feet east of the easterly line of Sycamore Canyon Road and on the north curb line sixteen hundred seventy (1670.00) feet east of the easterly line of Sycamore Canyon Road shall be the points of intersection of tangents of parabolic vertical curves which shall extend one hundred (100) feet, fifty (50) feet east and west of said points of intersection and that the said points shall supplant the straight lines within said limits.

The grades are given in feet above the City Datum Plane, and refer to the top of curbs. The profile of Maple Street designated and marked "Profile No. 733" on file in the office of the City Engineer of the City of Glendale, which more particularly exhibits the grades herein described is hereby declared to be the official profile and to exhibit the established grades of said portion of Maple Street.

Section 1-A. That the grade of that portion of Maple Street on the northerly side, from the east line of Glendale Avenue to the west line of Granada Street be and the same is hereby established as follows: At the intersection of the northerly curb line of Maple Street with the easterly line of Glendale Avenue the elevation of the grade shall be 511.20.

On the northerly curb line of Maple Street three hundred fifty-three (353) feet east of the easterly line of Glendale Avenue the elevation of the grade shall be 514.60.

At the intersection of the northerly curb line of Maple Street with the westerly line of Granada Street, the elevation of the grade shall be 517.20.

That between the above designated points the elevation of the grade shall conform to straight lines joining those points in the same side of Maple Street, excepting that the points of intersection of the grade lines on the north curb line three hundred fifty-three (353) feet east of the easterly line of Glendale Avenue shall be the point of intersection of tangents of a parabolic vertical

cal curve which shall extend one hundred (100) feet, fifty feet east and west of said points of intersection and that the said points shall supplant the straight lines within said limits.

The grades are given in feet above the City Datum Plane, and refer to top of curbs. The profile of Maple Street designated and marked "Profile No. 607" on file in the office of the City Engineer of the City of Glendale, which more particularly exhibits the grade herein described is hereby declared to be the official profile and to exhibit the established grades of said portion of Maple Street.

Section 2. That the grade of that portion of Mariposa Street from the northerly line of Acacia Street to the southerly line of Windsor Road be and the same is hereby established as follows:

At the intersection of the easterly curb line of Mariposa Street and the northerly line of Acacia Street the elevation of the grade shall be 492.26.

At the intersection of the westerly curb line of Mariposa Street and the northerly line of Acacia Street the elevation of the grade shall be 491.92.

On the easterly curb line of Mariposa Street five hundred seventy-five (575) feet south of the south line of Windsor Road the elevation of the grade shall be 504.30 and 504.00 on the westerly curb line opposite thereto.

At the intersection of the easterly curb line of Mariposa Street and the southerly line of Windsor Road, the elevation of the grade shall be 503.27.

At the intersection of the westerly curb line of Mariposa Street and the southerly line of Windsor Road, the elevation of the grade shall be 502.97.

That between the above designated points of elevation the grade shall conform to straight lines joining these points on the same side of Mariposa Street, excepting that the points of intersection of the grade lines on east and west curb lines of Mariposa Street one hundred and eighty-six and six tenths (186.6) feet north of the north line of Acacia Avenue shall be the point of intersection of the tangents of a parabolic vertical curve one hundred (100) feet in length and fifty (50) feet north and south of said point and said curve shall replace the straight lines within said limits.

The grades given are in feet above the City Datum Plane and are on the curb lines of the Street. The profile of Mariposa Street designated and marked "Profile No. 740" on file in the office of the City Engineer of the City of Glendale, which more particularly exhibits the grades herein described is hereby declared to be the official profile and to exhibit the established grades of said portion of Mariposa Street.

Section 3. That the grade of that portion of Elk Avenue from the westerly line of Central Avenue to the easterly line of San Fernando Road, be and the same is hereby established as follows:

At the intersection of the northerly curb line of Elk Avenue with the westerly line of Central Avenue the elevation of the grade shall be 504.40.

At the intersection of the southerly curb line of Elk Avenue with the westerly line of Central Avenue the elevation of the grade shall be 504.00.

On the southerly curb line of Elk Avenue five hundred (500) feet west from the westerly line of Central Avenue the elevation of the grade shall be 497.10.

At the intersection of the northerly curb line of Elk Avenue and the easterly line of Columbus Avenue the elevation of the grade shall be 492.30.

At the intersection of the southerly curb line of Elk Avenue and the easterly line of Columbus Avenue the elevation of the grade shall be 491.80.

At the intersection of the northerly curb line of Elk Avenue and the westerly line of Columbus Avenue the elevation of the grade shall be 491.30.

On the northerly curb line of Elk Avenue two hundred (200) feet west from the westerly line of Columbus Avenue the elevation of the grade shall be 489.40.

On the southerly curb line of Elk Avenue two hundred fifty (250) feet west from the westerly line of Columbus Avenue the elevation of the grade shall be 488.6.

On the northerly curb line of Elk Avenue six hundred twenty-five (625) feet west from the westerly line of Columbus Avenue the elevation of the grade shall be 485.70 and 485.30 on the southerly curb opposite thereto.

At the intersection of the northerly curb line of Elk Avenue with the easterly line of Pacific Avenue the elevation of the grade shall be 481.80.

At the intersection of the southerly curb line of Elk Avenue with the easterly line of Pacific Avenue the elevation of the grade shall be 481.50.

At the intersection of the northerly curb line of Elk Avenue with the westerly line of Pacific Avenue the elevation of the grade shall be 480.84.

At the intersection of the southerly curb line of Elk Avenue with the westerly line of Pacific Avenue the elevation of the grade shall be 480.64.

On the northerly curb line of Elk Avenue at a point four hundred and sixty-two and five-tenths (462.5) feet west from the westerly line of Pacific Avenue the elevation of the grade shall be 473.80 and 473.20 on the southerly curb line opposite thereto.

On the northerly curb line of Elk Avenue at a point eight hundred and sixty-two and five-tenths (862.5) feet west of the westerly line of Pacific Avenue, the elevation of the grade shall be 468.60 and 468.20 on (Continued on Page Ten)

NOTICE OF PUBLIC WORK

Public notice is hereby given that the Board of Trustees of the City of Glendale on the 17th day of June, 1920, did at its meeting on said day, adopt an ordinance of intention No. 386 to order the following improvement to be made, to-wit:

That that certain alley in the City of Glendale which lies between Harvard Street and Colorado Street and is one hundred and thirty (130) feet, more or less, east of the east line of Brand Boulevard be widened to a width of thirty (30) feet, from the south line of Harvard Street to a point one hundred seven and twenty-four hundredths (107.24) feet southerly therefrom; said widening to be done on the west side of said alley.

SECTION 2. That the land necessary and convenient to be taken for the improvement described in Section 1 hereof is situated in the City of Glendale, County of Los Angeles, State of California, and is more particularly described as follows, to-wit:

First: The Easterly fifteen (15) feet of Lot 1, Block 62 of Campbell and Thompson's Tract, as per Map recorded in Book 9, Page 56, of Maps, Records of Los Angeles County.

Second: The Easterly fifteen (15) feet of Lot 2, Block 62, of Campbell and Thompson's Tract, as

per Map recorded in Book 9, Page 56, of Maps, Records of Los Angeles County.

Sec. 3. The district to be assessed for the expenses of said improvement is described in and reference is hereby made to said Ordinance No. 386 for further particulars of said work.

T. W. WATSON,
City Manager and ex-Officio
Street Superintendent of the
City of Glendale.

NOTICE OF PUBLIC WORK

Public notice is hereby given that the Board of Trustees of the City of Glendale, on the 27th day of May, 1920, did at its meeting on said day, adopt a resolution of intention No. 1100 to order the following improvement to be made, to-wit:

Section 1. That all of that certain portion of that fifteen (15) foot alley in Tract No. 1680, as per map recorded in Book 21, Page 66 of Maps, Records of Los Angeles County, California, be closed up, vacated and abandoned for street and alley purposes.

Section 2. That the land necessary and convenient to be taken for the improvement described in Section 1 hereof is situated in the City of Glendale, County of Los Angeles, State of California, and is more particularly described as follows, to-wit:

Beginning at the intersection of the easterly line of Sycamore Canon Road and the southerly line of Lot 1, Tract No. 1680, as per map recorded in Book 21, Page 66 of Maps, Records of Los Angeles County, California; thence easterly along the southerly lines of Lots 1, 2, 3, 4, and 5, of said Tract No. 1680 to the southeast corner of said Lot 5; thence southeasterly across an alley to the northeast corner of Lot 28 of said Tract No. 1680; thence westerly along the northerly line of said Lot 28 to the intersection of the northerly line of said Lot 28 and the easterly line of Sycamore Canon Road; thence northerly along the easterly line of Sycamore Canon Road to the point of beginning.

Section 3. The district to be assessed for the expenses of said improvement is described in, and reference is hereby made to said Resolution of Intention No. 1100 for further particulars of said work.

T. W. WATSON,
City Manager, and ex-Officio
Street Superintendent of the
City of Glendale.

ORDINANCE NO. 389

(Continued from Page Nine)
the southerly curb line opposite thereto.
On the northerly curb line of Elk Avenue at a point eleven hundred and sixty-two and five-tenths (1162.5) feet west of the westerly line of Pacific Avenue the elevation of the grade shall be 464.10 and 463.90 on the southerly curb line opposite thereto.

At the intersection of the northerly curb line of Elk Avenue and the easterly line of San Fernando Road the elevation of the grade shall be 461.80.

At the intersection of the southerly curb line of Elk Avenue and the easterly line of San Fernando Road the elevation of the grade shall be 461.50.

That between the above designated points of elevation the grade shall conform to straight lines joining those points on the same side of Elk Avenue, excepting that the points of intersection of the grade lines on the south curb line five hundred (500) feet west from the westerly line of Central Avenue and on the north curb line two hundred (200) feet west of the westerly line of Columbus Avenue, and on the south curb line two hundred fifty (250) feet west of the westerly line of Columbus Avenue, and on the north and south curb lines six hundred twenty-five (625) feet west of the westerly line of Columbus Avenue, and on the north and south curb lines four hundred sixty-two and five-tenths (462.50) feet west of the westerly line of Pacific Avenue and on the north and south curb line eight hundred sixty-two and five-tenths (862.5) feet west of the westerly line of Pacific Avenue and on the north and south curb line eleven hundred sixty-two and fifty hundredths (1162.50) feet west of the westerly line of Pacific Avenue shall be the points of intersection of tangents of parabolic vertical curves which shall extend fifty (50) feet east and west from said points of intersection and that said curves shall supplant the straight lines within said limits.

The grades are given in feet above the City Datum Plane, and refer to the tops of curbs. The profile of Elk Avenue designated and marked "Profile No. 29" on file in the office of the City Engineer of the City of Glendale, which more particularly exhibits the grades herein described is hereby declared to be the official profile and to exhibit the established grades of said portion of Elk Avenue.

Section 4. That the grade of Oak Street from the westerly line of Central Avenue to the easterly line of Kenilworth Avenue be and the same is hereby established as follows:

At the intersection of the northerly curb line of Oak Street with the westerly line of Central Avenue the elevation of the grade shall be 512.00.

At the intersection of the southerly curb line of Oak Street with the westerly line of Central Avenue the elevation of the grade shall be 512.10.

At the intersection of the northerly curb line of Oak Street with the easterly line of Columbus Avenue the elevation of the grade shall be 500.70.

At the intersection of the southerly curb line of Oak Street with the easterly line of Columbus Avenue the elevation of the grade shall be 500.50.

At the intersection of the northerly curb line of Oak Street with the westerly line of Columbus Avenue the elevation of the grade shall be 500.10.

At the intersection of the southerly curb line of Oak Street with the westerly line of Columbus Avenue the elevation of the grade shall be 499.90.

On the northerly curb line of Oak Street two hundred (200) feet west of the west line of Columbus Avenue the elevation of the grade shall be 497.30 and 497.00 in the southerly curb line directly opposite thereto.

On the northerly curb line of Oak Street six hundred fifty (650) feet west of the westerly line of Columbus Avenue the elevation of the grade shall be 492.00 and 491.90 on the southerly curb line directly opposite thereto.

At the intersection of the northerly curb line of Oak Street with the easterly line of Pacific Avenue the elevation of the grade shall be 488.10.

At the intersection of the southerly curb line of Oak Street with the easterly line of Pacific Avenue the elevation of the grade shall be 488.30.

At the intersection of the northerly curb line of Oak Street with the westerly line of Pacific Avenue the elevation of the grade shall be 487.12.

At the intersection of the southerly curb line of Oak Street with the westerly line of Pacific Avenue the elevation of the grade shall be 486.98.

On the northerly curb line of Oak Street one hundred seventy-five (175) feet west of the west line of Pacific Avenue the elevation of the grade shall be 484.10.

On the southerly curb line of Oak Street two hundred forty-five (245) feet west of the west line of Pacific Avenue the elevation of the grade shall be 482.40.

On the northerly curb line of Oak Street four hundred seventy-five (475) feet west of the westerly line of Pacific Avenue the elevation of the grade shall be 480.00.

At the intersection of the northerly curb line of Oak Street with the easterly line of Kenilworth Avenue the elevation of the grade shall be 475.90.

At the intersection of the southerly curb line of Oak Street with the easterly line of Kenilworth Avenue the elevation of the grade shall be 475.32.

That between the above designat-

ed points of elevation the grade shall conform to straight lines joining those points on the same side of Oak Street, excepting the points of intersection of the grade lines on the north and south curb line two hundred (200) feet west from the west line of Columbus Avenue and on the north and south curb line six hundred fifty (650) feet west of the westerly line of Columbus Avenue; and on the north curb line one hundred seventy-five (175) feet west of the west line of Pacific Avenue, and on the south curb line two hundred forty-five (245) feet west of the west line of Pacific Avenue, and on the northerly curb line four hundred seventy-five (475) feet west of the westerly line of Pacific Avenue, shall be the points of intersection of tangents of parabolic vertical curves which shall extend fifty (50) feet east and west of said points of intersection and that the said curves shall supplant the straight lines within said limits.

The grades are given in feet above the City Datum Plane and refer to top of curbs. The profile of Oak Street designated and marked "Profile No. 50" on file in the office of the City Engineer of the City of Glendale, which more particularly exhibits the grades herein described is hereby declared to be the official profile and to exhibit the established grades of said Oak Street.

Section 5. That the grade of that portion of Harvard Street from the west line of Central Avenue to the east line of Kenilworth Avenue be and the same is hereby established as follows:

At the intersection of the north curb line of Harvard Street with the west line of Central Avenue the elevation of the grade shall be 515.90.

At the intersection of the south curb line of Harvard Street with the west line of Central Avenue the elevation of the grade shall be 515.20.

At the intersection of the north curb line of Harvard Street with the east line of Columbus Avenue the elevation of the grade shall be 502.50.

At the intersection of the south curb line of Harvard Street with the east line of Columbus Avenue the elevation of the grade shall be 501.50.

At a point in the north curb line of Harvard Street four hundred fifty (450) feet west of the west line of Columbus Avenue the elevation of the grade shall be 498.30.

At a point in the south curb line of Harvard Street five hundred (500) feet west of the west line of Columbus Avenue the elevation of the grade shall be 496.90.

At the intersection of the north curb line of Harvard Street with the east line of Pacific Avenue the elevation of the grade shall be 491.60.

At the intersection of the south curb line of Harvard Street with the east line of Pacific Avenue the elevation of the grade shall be 491.30.

At the intersection of the north curb line of Harvard Street with the west line of Pacific Avenue the elevation of the grade shall be 490.39.

At the intersection of the south curb line of Harvard Street with the west line of Pacific Avenue the elevation of the grade shall be 489.91.

At a point in the north curb line of Harvard Street two hundred twelve and five-tenths (212.5) feet west of the west line of Pacific Avenue the elevation of the grade shall be 486.10 and 485.90 on the south curb line opposite thereto.

At a point in the north curb line of Harvard Street seven hundred twenty-two and five-tenths (722.5) feet west of the west line of Pacific Avenue the elevation of the grade shall be 481.70 and 481.35 on the south curb line opposite thereto.

At the intersection of the north curb line of Harvard Street with the east line of Kenilworth Avenue produced, the elevation of the grade shall be 479.20.

At the intersection of the south curb line of Harvard Street with the east line of Kenilworth Avenue the elevation of the grade shall be 478.80.

Between the above designated points of elevation the grade shall conform to straight lines joining said points of elevation which fall on the same side of Harvard Street, except that the points on the north and south curb line two hundred twelve and five-tenths (212.5) feet west of the west line of Pacific Avenue shall be points of intersection of the tangents of parabolic vertical curves one hundred (100) feet in length and extending fifty (50) feet east and west of said points and said curves shall replace the straight lines within said limits.

The elevation of the grades given are in feet above the City Datum Plane and refer to the top of curb.

The profile of Harvard Street designated and marked "Profile No. 23" on file in the office of the City Engineer of the City of Glendale which more particularly exhibits the grades herein described is hereby declared to be the official profile and to exhibit the established grades of said portion of Harvard Street.

Section 6. That the grade of that portion of Kenilworth Avenue from the northerly line of Colorado Street to the southerly line of Harvard Street be and the same is hereby established as follows:

At the intersection of the westerly curb line of Kenilworth Avenue and the northerly line of Colorado Street the elevation of the grade shall be 470.80.

At the intersection of the easterly curb line of Kenilworth Avenue and the northerly line of Colorado Street the elevation of the grade shall be 471.30.

At the intersection of the easterly curb line of Kenilworth Avenue and the southerly line of Oak Street the elevation of the grade shall be 475.32.

At the intersection of the easterly curb line of Kenilworth Avenue and the northerly line of Oak Street the elevation of the grade shall be 475.90 and 475.50 on the westerly curb line opposite thereto.

At the intersection of the easterly curb line of Kenilworth Avenue and

the southerly line of Harvard Street the elevation of the grade shall be 478.80 and 478.40 on the westerly curb line opposite thereto.

At the intersection of the westerly curb line of Kenilworth Avenue and the northerly line of Harvard Street the elevation of the grade shall be 478.80.

That between the above designated points of elevation of the grade shall conform to straight lines joining those points on the same side of Kenilworth Avenue excepting that the points of intersection of the grade lines on the westerly curb line of Kenilworth Avenue opposite the northeast corner of Oak Street and Kenilworth Avenue shall be the point of intersection of the tangents of a parabolic vertical curve one hundred (100) feet in length and extending fifty (50) feet north and south of said point and said curve shall replace the straight lines within said limits.

The elevations of the grades given are in feet above the City Datum Plane and refer to top of curb. The profile of Kenilworth Avenue designated and marked "Profile No. 735" on file in the City Engineer's office, City of Glendale, California, which more particularly exhibits the grades herein described, is hereby declared to be the official profile and to exhibit the established grades of said portion of Kenilworth Avenue.

Section 7. The City Clerk shall certify to the passage of this Ordinance and shall cause the same to be published once in the Glendale Sentinel-Progress, a weekly newspaper of general circulation, published and circulated in said City of Glendale, and thereupon and thereafter the same shall be in full force and effect.

Adopted this 22d day of July, 1920.

HARTLEY SHAW,
President of the Board of
Trustees of the City of
Glendale.

Attest:
J. C. SHERER,
City Clerk of the
City of Glendale.

STATE OF CALIFORNIA,
COUNTY OF LOS ANGELES, (SS.
CITY OF GLENDALE.)

I, J. C. Sherer, City Clerk of the City of Glendale, do hereby certify that the foregoing Ordinance was duly adopted by the Board of Trustees of the City of Glendale, State of California, and signed by the President of said Board at a regular meeting thereof, held on the 22d day of July, 1920, by the following vote, to-wit:

Ayes: Bartlett, Henry, Robinson, Shaw, Stephenson.
Noes: None.
Absent: None.

J. C. SHERER,
City Clerk of the
City of Glendale.

ORDINANCE NO. 388

AN ORDINANCE OF THE CITY OF GLENDALE AMENDING ORDINANCE NUMBER 382 OF SAID CITY.

The Board of Trustees of the City of Glendale do ordain as follows:

Section 1. That Section 9 of Ordinance No. 382 "AN ORDINANCE OF THE CITY OF GLENDALE FIXING THE SALARIES OF THE OFFICIALS OF SAID CITY, AUTHORIZING THE EMPLOYMENT OF SAID CITY AND FIXING THE COMPENSATION OR RATES OF PAY THEREFOR, AND REPEALING ORDINANCE NO. 356 AND ALL ORDINANCES AMENDATORY THEREOF" be amended to read as follows:

Section 9. In addition to the officers of the City of Glendale in the Public Works Department, the employment of the following employees is hereby authorized in accordance with the provisions of Section 14 of Ordinance No. 355, and the compensation or rates of pay of such employees is hereby fixed as follows, or less:

Draftsman and Transmittin, each, per month\$150.00
Senior Draftsmen, each, per month\$140.00
Junior Draftsmen and Linemen, each, per month\$130.00
1 Stenographer and Office Clerk, per month\$ 90.00
1 Street Foreman, per month\$150.00
1 Assistant Superintendent of Buildings, per month\$150.00
1 Assistant Superintendent of Buildings, per month\$140.00
1 Assistant Superintendent of Buildings, per month\$ 40.00
Engineer Road Roller, per day\$ 8.00 (60 days)

Laborers, Teamsters, Truck Drivers, each, per day\$ 4.25
Section 2. That Section 10 of said ordinance shall be amended to read as follows:

Section 10. In addition to the officers of the City of Glendale in the Public Service Department, the employment of the following employees is hereby authorized in accordance with the provisions of Section 14 of Ordinance Number 355, and the compensation or rates of pay of such employees is hereby fixed as follows, or less:

Division of Engineering
1 Draftsman, per month\$150.00
Division of Plant and Production
Line Foreman, per day\$ 7.00
Linemen, each, per day\$ 6.50
Apprentice Linemen, each, per day\$ 5.00
Linemen's Helpers and Truck Drivers, each, per day\$ 4.50
Utility Men, each, per day\$ 5.00
Water Construction Foremen, each, per day\$ 6.50
Water Service Foremen, each, per day\$ 6.00
Water Service Men, each, per day\$ 4.75
Caulkers, each, per day\$ 5.00
Laborers, each, per day\$ 4.25
Carpenters, each, per day\$ 7.50
Pumping Plant Engineer, per hour\$.60

A Shower Bath

daily is a luxury you would greatly enjoy if you had the facilities in your home for it.

You can enjoy it and at small expense, too, without having a shower bath installed in your home, with a

Knickerbocker Shower-Bath Brush

You can have a shower, shampoo, massage and rub-down all at once in your own home, and at very slight expense.

The Knickerbocker fits any bath tub and is guaranteed to give you good service for a year. The Knickerbocker way is the quick and sanitary way.

Can you do without a Knickerbocker this hot weather, when you'll get a million dollars' worth of comfort from it, and you can buy one here

REPORT ON SEWAGE DISPOSAL FOR THE CITY OF GLENDALE

Prepared by Olmsted and Gillelen and Submitted to the Board of Trustees July 22, 1920

SEE MAP NEXT PAGE

GENERAL. It is the purpose of this report to convey in as clear a manner as possible the sanitary situation that confronts the City of Glendale. While it is necessary to some extent to include certain essential technical details, for a fuller comprehension of the problem, in the main the effort has been to reduce the mass of details and figures to a few salient costs.

Historically, as a town, Glendale has had a very remarkable career. She has grown from a city of 2700 in 1910 to approximately 15,000 in 1920. Such rapidity of growth brings added difficulties in the way of proper administration. Time has been a most important factor and in the rush to keep pace with the population there has been a necessary tendency to attend only to those municipal improvements imperatively demanded.

The promptness with which municipal problems were solved was undoubtedly an important factor in Glendale's growth. Her citizens have been given every advantage of modern municipal government, except one; no modern sewerage facilities have been provided.

That a town could attain the size of Glendale without providing modern means for the disposal of its wastes seems almost unbelievable and is almost without a parallel in the whole United States. The reason is perhaps two-fold; first, built on a very porous and sandy soil, conditions have been excellent for cesspools; second, no apparent point of disposal suggests itself except the Los Angeles River which is the partial source of domestic water for the City of Los Angeles.

By far the majority of the citizens of Glendale will view the matter of a bond issue for sanitary sewers in a very sensible and reasonable light, provided, however, the proposed improvements are explained in such a way as to be clear on one point, namely, in dollars and cents how will their position be bettered.

Before going into the details of the improvements it is believed should be made, it would be well to analyze conditions as they now are:

From actual costs gathered from cesspool contractors the average cesspool cost is found to be not less than \$45 with a life of six years. At present, based on a study of population and water services, there are 3500 cesspools in the city. These cesspools are costing their owners a total of \$157,500 each six years, or a yearly total of \$26,300, which would pay the interest and sinking fund on a bond issue of \$329,000. Consideration should be given the most important fact, however, that this sum represents only those property owners who have improved their property. It is neither fair nor just that the cost analysis should stop with the present, for the growth of Glendale has been demonstrated by past performance. It is certainly safe to estimate a population of 40,000 persons 20 years hence. With four persons to each dwelling, a figure based on the ratio between present water connections and population, there will be 10,000 cesspools in 1940 costing their owners 75,000 yearly, an amount sufficient to meet the interest and sinking fund on a bond issue of \$940,000.

In contrast with this huge sum, which the owners of improved property only are burdening themselves, is the expenditure of a sum sufficient to construct a sanitary sewer system, which is designed not only for the present needs but for conditions as they will exist forty years hence, the cost of which will fall not alone on the owner who has built his home, but will be proportioned against both vacant and improved property.

PERIOD OF DESIGN. In designing a sewer system it is necessary to provide for a reasonable period of growth and at the same time not pass an economic limit which is set by the cost of construction. It would be poor practice to provide for a population so far in the future that the full efficiency of the sewer would not be realized during the life of the bond issue provided for the improvement. In accordance then with precedent and experience, a period of 40 years is taken as the economic basis for design.

AREA. The area which it is estimated will be tributary to the system is shown in detail on Plate No. 1 and totals approximately 8000 acres. Glendale has ample room in which to grow within her present corporate limits and it is not believed reasonable to assume that additional extensive annexations will be made.

POPULATION. Plate No. 1 shows the rate of growth of Glendale in comparison with other California cities together with the estimated curve of future growth. This curve was drawn after a careful study of growth in other California cities and is by way of being a mathematical prediction.

DISTRIBUTION OF POPULATION.—Table No. 1 gives the area, population, and population density of six cities contiguous to Los Angeles.

Table No. 1

Name of City	Area Square Miles	1918 Population	Persons Per Acre
Monrovia	6.0	5,000	1.3
Pasadena	13.22	51,500	4.95
Alhambra	9.00	10,000	1.74
South Pasadena	3.44	8,500	3.87
Burbank	12.00	2,600	0.34
Glendale	10.00	12,000	1.87

Studies of population densities in San Diego show a range of from five persons per acre in outlying, well built-up residential areas to 60 persons per acre in the business area, with an average of 15 to 20 persons per acre in what may be termed the Apartment House District.

In consideration of the above, together with experience in many other California cities, the future population of Glendale has been distributed as shown on Map No. 1.

Area No. 1, comprising some 3620 acres of valley and hill land has been assigned a future population density of 1.0 persons per acre. This low density being used because of the high percentage of rough hill land that is not susceptible to massed building.

Area No. 2, Map No. 1, with an area of 1440 acres, it is believed will always be held in larger parcels than the average city lot, its location and topography making it adaptable for the purpose of half-acre farm lots, therefore the population which eventually will be contributing to the city sewer flow has been set at three persons per acre.

Area No. 3 is similar in topography to area No. 1, but because of its nearness to Los Angeles will be more thickly settled. A density of two persons per acre therefore should be used. The balance of the city it is estimated will attain a population density of 20 persons per acre within the next 40 years, giving an ultimate population of approximately 65,000 persons in 1960, or an average population density for the whole city of approximately eight persons.

WATER CONSUMPTION. Investigations in Los Angeles in 1910 showed the average consumption of water to be 1 inch to 5.03 acres for first-class resident district; 1 inch to 7.11 acres for second-class resident district; and 1 inch to .458 acres for the business district.

The average daily consumption in Glendale is approximately 125 inches serving 3686 consumers. The population is estimated at 12,538 or 3.4 persons per service, which would give an average daily per capita consumption of 129 gallons which is in accord with a per capita consumption of 120 gallons daily in both Los Angeles and Pasadena.

On the basis of the estimated future population density of 20 persons per acre and a daily water consumption of 125 gallons per capita, the consumption would be at the rate of one inch to 5.2 acres which checks with the actual measured consumption in Los Angeles for residential districts.

In San Diego in 1918 studies made of water consumption in the business district showed a daily use of 25,000 gallons per acre during the month of July. Relating the use during this one month to the average draft during the year would predicate an average daily use of 18,500 gallons per acre, or 1 inch to 1.4 acres.

It is believed more reasonable to be governed by the consumption in San Diego than that in Los Angeles, in an effort to establish a use which might be expected in Glendale.

SEWER FLOW. In Los Angeles the average per capita flow as ascertained from the office of the City Engineer, is 67 gallons daily over the whole city and 54 gallons per capita per day from the Hollywood District. Gaugings taken over a period of five years at Pasadena indicate an average daily sewer flow of 50 gallons per capita. In relation to water consumption, the sewer flow is 55 per cent in Los Angeles and 42 per cent in Pasadena. It is believed that Glendale system should not be designed for a flow of less than 60 gallons per capita average daily, with an hourly maximum 300 per cent greater. The flow from the Business District should not be less than 15,000 gallons per acre average daily with a maximum of 45,000 gallons per acre per day.

DISPOSAL. Three alternatives offer themselves for the solution of the problem of disposing of the city's sewage. Two of these have been gone into in detail as to comparative cost. Investigation of the third has been of a more general nature.

Plan No. 1 contemplates disposal of the city's waste by connecting with the sewerage system of the City of Los Angeles. Such a course of action would undoubtedly mean annexation. Map No. 2 shows the layout of a system for that portion of the City of Glendale at present requiring service, in conformity with the plan mentioned above.

The nearest point in the Los Angeles system at which an outfall sewer from Glendale might connect is at First and Anderson Streets. To reach this point would necessitate the construction of a 30-inch sewer 30,000 feet in length from the lower city limits of Glendale and involves crossing the Arroyo Seco. The ability of the 30-inch sewer in Los Angeles to carry the future flow from the 30-inch Glendale outfall in addition to the flow from the extensive portion of East Los Angeles, which it now serves, is somewhat questionable, and it is not at all uncertain that in the event a larger interceptor should at a future date prove necessary, Glendale would be assessed for her share in the cost of such construction.

The grade of the Los Angeles 30-inch sewer below Anderson Street is .45 per cent which will care for a population of 90,000 persons contributing at the maximum rate of 180 gallons daily, or 60 gallons per capita average. In Los Angeles City alone there is some nine or ten thousand acres tributary to this line, of which it may be conservatively stated 60 per cent will be settled.

It is difficult for us to predicate the solution of an outfall for Glen-

dale into the Los Angeles sewers. The growth of Los Angeles has been so phenomenal that the whole intercepting system is today virtually overloaded and what the growth of a few years more will require is a problem. The Los Angeles outfall has a nominal capacity of 116 cubic feet per second and it is admitted that now it daily reaches 80 cubic feet per second and at times the flow has reached the maximum capacity of the line.

In addition to this engineering complication of adding so large a unit as the Glendale sewage is the fact that it must include the bonding responsibility to be assumed by Glendale upon annexation (which is the only way according to the stated policy of Los Angeles the connection could be made) and which carries the following financial burden:

Purpose	Authorized	Issued
Water	\$26,000,000	\$22,546,250
Harbor	6,500,000	4,512,000
Power	7,686,000	7,686,000
Electric		
Plants	13,500,000	None
Additional		
Harbor	4,000,000	None
Sewer	1,062,000	1,034,000
	\$58,748,000	
Interest 4 1/2 per cent per annum.		

Assessed Valuations

Los Angeles City\$533,567,105.00
Glendale City 7,692,995.00
The tax to be assumed would be in rough \$845,000 or \$38,000 annually for interest plus approximately \$21,125 on principal or \$59,125 minus whatever unstated credits the power and electric revenues might furnish. This latter may be considerable and relieve the comparison or it may not.	

Referring to Map No. 2, the main interceptors are shown in red and should be built under a general bond issue. The balance of the system as shown in blue and yellow should be built under the district plan as being the most equitable. The yellow lines show that portion of the business district which is in urgent need of sewers, and for which a detailed estimate has been made.

The estimated cost of the interceptors including the line to First and Anderson Streets in Los Angeles is approximately \$306,000 and is given in detail in Appendix No. 1. The estimated cost of sewerage the business district on the district plan as shown on Map No. 2, is \$61,217. The estimated average cost of lateral lines built under the district plan is \$1.70 per foot.

PLAN NO. 2. Plan No. 2 contemplates disposing of a treated sewage in the Los Angeles River and has been included in this report because of its possibility and not its probability. In other words it is not conceived probable that Los Angeles would sit idly by and let a neighboring city dispose of its wastes in a practically dry stream from which she derives a portion of her domestic water supply.

This plan would call for high and low level interceptors delivering the sewage at a point on the river probably in the neighborhood of Aviation drive, as it would be necessary to go above the city line of Los Angeles before the effluent could be disposed of in the river. At this point it would be necessary to have extensive space for primary and secondary settling tanks, filters and chlorinating apparatus. Such a plant would be a burden as to upkeep, and would bring in no return. Assuming such a plant were built to care for a population of 20,000 persons, it is estimated the cost would approximate \$120,000 exclusive of the land.

It would likewise be necessary to pump the sewage from a portion of the city.

PLAN NO. 3. This plan has been given the most study and is believed by far the most practical both from an economic and sentimental viewpoint. Referring to Map No. 3, it is proposed to construct two main interceptors and two secondary interceptors as shown. The lower or west interceptor will deliver to the lowest point of the city where it is proposed shall be installed a small fine screen, which will remove the larger portions of the solids. The screened sewage will then be lifted by booster pumps to Pumping Plant No. 2 which also includes a small screen to handle the flow from the east and west central interceptors. Pumps at No. 2 lift the combined screened sewage from Plant No. 1 and Plant No. 2 to Plant No. 3 which in turn elevates the liquid to a gravity line at the head of Force Main No. 3, by which it is carried to a filtering plant at the head of Scholl Canyon.

This canyon is secluded, has a porous sandy soil and is ideal for citrus culture because of its frostless nature. Its area as defined by the 900-foot contour and the Sycamore Canyon road is approximately 360 acres. It is believed both feasible and practical to use the filtered effluent to irrigate this area and bring it up to a high class revenue producing property.

The idea is neither new or novel. Sewage is being used for irrigation in Pasadena, San Bernardino, Pomona, Ontario, Riverside, and many other California cities and frequently is a source of revenue to the city. It is true that in some cases difficulty has been experienced in handling the sewage, but this has been due to the manner of treatment and method of handling as well as the characteristics of the soil. Most of the towns in the San Gabriel Valley attempt no treatment of any sort and apparently experience but slight difficulty.

It is believed that the most practical plan for the city to pursue in handling such a project would be to secure a long term lease on this acreage with the option to buy at a previously determined figure and in turn sublease in smaller holdings with irrigation water delivered at the high point of each parcel. Enough revenue should be produced in this way to allow a margin of profit in excess of the return from irrigating water sold.

In enlarging upon the above outlined plan, the following is presented:

INTERCEPTORS. Map No. 3 gives the location and sizes of the interceptors planned. These are designed in accordance with the basis figures detailed earlier in this report. The location of the west central interceptor was decided upon only after comparative estimates with other alternative locations.

SCREENS AND PUMPING STATIONS. Screens would be of the fine slot, rotary disc type, such as has been used with entire success in Long Beach, Santa Barbara and Stockton. They will be self-cleaning and will discharge the screenings into a closed underground vault from which they will be pumped tri-weekly into tank wagons and hauled to the head of the canyon, there to be composted with the city's street sweepings and used as fertilizer on the orchards.

This plan is being carried out without nuisance and to the satisfaction of all concerned at Santa Barbara within three blocks of the Belvidere Hotel.

The building which will house the screen and pumps will be small and may be made as attractive architecturally as desired and will in no sense be externally indicative of its use. The pumps will be centrifugal, automatically controlled and will need only occasional inspection and oiling owing to the screening of the sewage before being pumped. The usual bug-bear of clogged runners will be eliminated. One man can with ease care for the three plants as well as look after the filter.

COST OF PUMPING. In estimating the requirements for the present, it is believed that by adopting a population of 15,000 persons and eliminating Areas 1, 2, and 3, Map No. 1, a fairly close value may be ascertained as to present population densities.

With an area of 2500 acres and a population of 15,000, the number of persons per acre is six. Undoubtedly this entire population will not be connected with the sewer for at least two or three years. For example, it is four years since Long Beach built her main interceptor and disposal works under a general bond issue and she is still at work on the construction of the lateral systems under the district plan.

However, in computing the pumping charge, this fact will not be taken into account.

On the basis of six persons per acre and a flow of 50 gallons per capita per day, which is below the amount for which the sewers were designed, but which it is believed will more nearly approximate conditions as they will be immediately realized, the flow tributary to Pumping Station No. 1 would be 335,000 gallons daily. Pumping capacity to handle a flow of 250 per cent greater should be provided. One 600 gallon per minute pump would meet these requirements but for the purpose of a safeguard and standby, two pumps of this capacity would be installed. 30 horsepower motors would be necessary and the estimated power consumption would be:

30x746x9.3x30 equals 6250 K. W. hr. per month.	
The cost for power per month at No. 1 would be:	
6250x 1.3 equals	\$81.00
30x .35 equals	10.50

\$91.50

The flow tributary to Plant No. 2 would be:

1374 acres x 6 persons x 50 gallons equals, gallons daily	412,000
Plus flow from No. 1, gallons daily	335,000

Gallons daily

Pumps necessary, two 800 gallons per minute.

Motors—50 horsepower.

Power consumption:

50x746x15.5x30 equals 17,400 K. W. hr. per month.

Cost of power per month at No. 2:

17,400x1.3 equals \$226.

Standby 50x.35 equals 17.50

Per Month \$243.50

Pumps at No. 3 will be of same size and capacity as No. 2 but will operate one hour longer.

Motors 125 horsepower.

Power consumption:

120x746x16.5x30 equals 44,250 K. W. hr. per month:

Cost of power at No. 3:

Standby 125x.35 equals 43.75

Per Month \$617.75

Total power cost:

Pumping Station No. 1 \$91.50

Pumping Station No. 2 \$243.50

Pumping Station No. 3 \$617.75

Per year \$11,400; per month \$952.75

This pumping cost has made available for use, approximately 750,000 gallons of excellent irrigating water on land susceptible to the cultivation of citrus fruits.

With a water duty of 1 inch to 5 acres, 290 acres can be taken care of with a cost of water development of 2.25c per inch hour, which, cost in comparison with charges for water

in similar sheltered districts adapted to citrus culture, is most reasonable. As has been above intimated, this water would become available only as districts were formed and constructed, thus eliminating the problem of an immediate disposal of a heavy flow before the land could be prepared to handle it.

It might also be here stated that undoubtedly a market could be found for irrigating water with the Japanese truck gardeners in the vicinity of Pumping Station No. 2.

The quality of the effluent from the filter would be such as to permit no objection being raised to its use for irrigation. Filtration experiments carried out at Pasadena showed conclusively that over 90 per cent of the total solids which of themselves constitute less than 2 per cent of the sewage may be economically removed. The dissolved nitrates in the effluent further increase the value of the water as an important item toward increased fruit production.

Recent developments in citrus culture have demonstrated the value of winter irrigation as a preventative against frosted trees. It is believed that with such a soil as is found in the canyon mentioned, no possible damage would arise from winter irrigation. The fact that sewage flow is lightest during the winter months also tends to dissipate any question as to the disposal of the sewage during the ordinary non-irrigating periods.

ESTIMATE OF COST—PLAN NO. 3.

A complete estimate of cost of interceptors, pumping stations, screens, force mains and gravity line to filters as well as the filters is embraced in Appendix No. 2. All the work contemplated in this estimate should be done under a general bond issue. The laterals would be built under the district plan as mentioned under Plan No. 1 and would cost approximately \$1.70 per foot.

Yellow lines on Map No. 3 show, as on Map No. 2, the district which is at present in urgent need of service and for which a separate estimate has been made as included in Appendix No. 3. The cost of temporarily serving this district with a separate system of disposal to the river disregarding its relation to the interceptor system of Plan No. 3 is contained in Appendix No. 4.

CONCLUSIONS. Having determined upon the cost of a sanitary sewer system, it is possible to make a direct comparison in the manner outlined elsewhere in this report.

Taking Plan No. 3 as a basis, details of which are treated of further in this report, the estimated cost of interceptors, force mains, screens, pumps, filters, etc., is as shown in Appendix No. 2, approximately \$336,000.

The assessed valuation of the non-operative property in the City of Glendale was in 1918 approximately \$5,500,000 of which roughly \$3,500,000 is listed as the value of real estate and \$2,000,000 as improvements and personal properties. These facts would tend to show that the average assessed valuation of improved property is about \$1,000. The yearly taxes necessary to take care of the interest and sinking fund on the bond issue would be \$0.49 per \$100 or \$4.90 per year for the average owner of improved property. To

this amount would be added the district assessment which is payable over a period of ten years and which on the basis of a 50-foot frontage would amount to \$4.25 yearly, thus bringing the total yearly cost to \$9.15 yearly. This in comparison with an average cost of \$7.50 yearly for cesspools.

It should be borne in mind that each year decreases the interest on the bond issue, that each year the assessed valuation of the city increases and the tax rate necessary to carry the issue decreases. Thus, when the city attains an assessed valuation of \$10,000,000 which undoubtedly will be not more than ten years hence, the tax rate on an assessed valuation of \$1,000 which will be necessary to carry the interest and sinking fund on a \$336,000 bond issue will be only \$2.00. The yearly payments on the district assessment plan will have been paid off and the comparison stands \$2.00 a year for sanitary sewers against \$7.50 a year for cesspools.

Or, to look at the matter in a less favorable light, assume that there is no increase in the assessed valuation of the city and compare cesspools and sewers over a period of 40 years which is the life of the bonds.

The sinking fund on a bond issue of \$336,000 on a 40-year serial basis would be \$8,400 yearly. The average yearly interest for the 40-year period would be \$9,250 at a rate of 5 1/2 per cent, making an average yearly amount of \$17,650 to be met by taxation. During the 40-year period, the property owner whose home is assessed at \$1,000 would pay

4.25x10 equals, District Assessment	\$ 42.50
3.20x40 equals, taxes	128.00

Total for Sanitary Sewers

for 40 Years \$170.50

or an average of \$4.25 yearly against

7.50x40 equals, total for cesspools for 40 years \$300.00

It is firmly believed that any open-minded person willing to abide by the above figures, or to figure the matter out to his own satisfaction, cannot but be convinced that from a purely monetary standpoint sewers are good business.

As will be noted, no mention is made of maintenance. Pasadena paid last year approximately \$31.50 per mile for maintaining her 130 miles of sewers. Glendale should be able to maintain her sewers for the same amount.

The total sewers shown on Map No. 3 are in the neighborhood of 54 miles, which on the basis of the Pasadena figure would cost the city \$1700 yearly for upkeep. This figure would not necessarily be realized for many years, as it is not reasonable to suppose a new system would cost as much to maintain as an old one.

No other operating costs should be figured as being met by taxation, as the cost of pumping and plant operation should more than be met by the revenue from land leases and sale of water.

Many California cities have adopted the plan of making all house connections, for which service the actual cost plus a slight profit, is charged

the householder. This is an additional source of revenue besides saving an exorbitant plumbing bill for the property owner.

RECAPITULATION.

Plan No. 1. Disposal, connecting with Los Angeles Sewer. Cost of Interceptors \$305,930. Business District Sewers (Assess. District) \$61,317. Cost of Lateral Sewers, \$1.70 per foot.

Plan No. 2. Disposal—Los Angeles River. Estimate of cost—not made. Cost of Business District Sewers (Assess. District). Separate treatment plant on River \$76,840.

Plan No. 3. Disposal—Irrigation. Cost of Interceptors, Pumps, etc., \$336,184. Business District Sewers (Assess. District) \$41,192. Cost of Lateral Sewers \$1.70 per foot.

RECOMMENDATION. It is recommended that a bond issue for \$350,000 be called for the purpose of constructing necessary interceptors, force mains, gravity lines, buildings, sumps and filters and to purchase pumps, screens and all necessary electrical equipment as outlined under Plan No. 3 and shown on Map No. 3.

That steps be taken immediately to ascertain the possibility of leasing or purchasing the 360 odd acres in Scholl Canyon, and a plan worked out for its future lease or sale.

Respectfully submitted,

OLMSTED & GILLELEN.
By FRANK H. OLMSTED.
